

Component-Ready Courses

Some of your Honors credits can be earned doing an [Honors Component](#). The courses below have been designated as **Component-Ready** by the faculty teaching them. This means the instructor has indicated a desire to work with honors students on Component projects - in some cases they may already have some ideas for interesting projects! You still need to contact the instructor prior to the start of the semester, following the [process for adding Components](#). But if a course is listed below,, it means that instructor has already said they are able to work with you! (*Note: you can ask about doing a component in **any** course you take at BCC - "Component-Ready" simply means the instructor has said, ahead-of-time, that they are eager to work with Honors students on these projects*).

AHS 155 *Stress and Your Health* (Gawron)
