

Video Sales Formula

A step by step simple formula for creating thousands of dollars with sales videos

Congratulations on picking up a copy of video sales formula.

What I'm going to share with you in this report is the exact video sales template that I have been using for over 2 years to make thousands of dollars with just one sales video.

Sales videos are very powerful if used right and can often be a lot easier because you only have one video to upload to your sales page instead of all of the wording and graphics if you were to create a text based sales page.

I have been using this sales video template to sell one of my entry level products in my business but this template will quite easily work for pretty much any product or service.

What I'm going to share with you is the exact wording of my own sales video presentation and then I'm going to include a similar template below that but it will be a "fill in the blanks" template instead where you can adapt it to your own product or service.

Also what I will do is explain what the different parts of the sales video are and why they are needed and why they are effective.

You are basically tapping into the mind of your customer within the sales video, the same as what you do in a text based sales page but the difference in a video is that it's a lot more interactive and people can become a lot more engaged to a sales video and as long as you use an effective sales script your results can be fantastic.

Please note: I have not included the text for all of the features and benefits for my sales video in the text below because it was a little irrelevant. If you want to see exactly how I did do it and what I wrote then by all means watch my sales video which can be found in the resources section at the bottom of this report.

Are you ready/

Ok lets dive in.

The fill in the blanks template is made up of many different

sections:

Strong headline – Grab peoples attention

Incentive to stay – Gives people a reason to stay till the end

Eliminate their doubt – Say what they are thinking

Connect with your prospects – Sympathize with your prospect

Demonstrate huge Value and your authority – Example of why they are getting a great deal

Price teaser – You mention the price but don't reveal it

Features and benefits – What they will learn and get

Price drop – The powerful price drop strategy

Price is revealed – Buy button appears

Scarcity – Make it a limited time offer

Guarantee – No risk to them

Scarcity – Create more urgency to act now

Close – Tell them to act now and buy below

1. The very first thing you need to have on your video is a strong headline which encourages people to watch the remaining video and stay for longer.

This is very important because you need to create interest and some curiosity from the very start and tap into the mind of your potential customer otherwise most people will not hang around for long and your conversions will suffer badly.

So.... It all starts with the headline in your video.

The headline I use for my sales video is:

“Who Else Wants to Create their own Highly Profitable List Building Machine that Sends you Hoards of \$7 - \$47 payments all on 99% auto-pilot?”

The type of traffic that I generate to this sales video are all interested in list building so when they see this main headline they are instantly curious and many people stick

around to at least find out more.

If you were creating a sales video for something to do with losing belly fat it could read something like this:

“Who else wants to Lose Belly Fat, Build Muscle and Sculpt the Body of Your Dreams in only 30 mins a Day?”

This sales video formula would work in any niche as long as you follow the fill in the blanks template below.

This is the script for my sales video:

Hey it's Eric Hammer here and I'm super excited because today I have a very special announcement for you so you need to keep your eyes Glued to this video because I'm about to share with you how a very select group of people are going to get the opportunity to get an exclusive behind the scenes the look at my exact highly profitable list building system.

With your permission I would like to invite you to watch over my shoulder as I show you the inner workings of my complete list building system and how I'm able to generate hoards of \$7 - \$47 payments all on 99% auto-pilot.

And no this is NOT some garbage push button secret software, this is a system that I hear very few people talking about.

Now I do realize that being able to generate hoards of \$7 - \$47 payments all on 99% auto-pilot may sound like a bunch of BS, without knowing the details of this technique I would be sceptical too but when you hear the details in just a moment you're going to be pleasantly surprised at just how easy it can be to create your own highly profitable list building machine and start generating income in as little as 12 hrs.

As you probably know there's nothing more profitable than having your own list unfortunately most people never end up building a list because they think it's too difficult or too technical.

And usually they're right.

Lots of people spend weeks, months even years trying to build a list and make money, in fact this is exactly what I went through when I first started trying to build my own profitable list.

Months of late nights, plenty of coffee and me racking my brains trying to figure out how the hell I was supposed to build a list and make money.

And yes I did end up building a list but for the amount of hours I was putting in and the amount of profits and money that I was making when I was building my list it was “pretty embarrassing” to say the least.

It became quite clear to me that dreams of the internet life style were going to be a distant fairy tale if I didn’t figure out how to build a list and make good money a whole lot faster.

Fast forward a year later and I have now discovered a simple formula for creating a highly profitable list building formula in record time.

Since discovering this simple list building formula I am now able to set up list build systems that generate \$7 - \$47 payments on demand while working on 99% auto pilot.

I thought list building was supposed to be hard but little did I know that the most successful marketers online are keeping a few secrets in their back pocket for building highly profitable lists in record time, and I’ve discovered 7 of their secrets, 7 very powerful and profitable tactics that allow you to create an incredibly highly profitable list building system in record time and start making money in as little 12 hrs.

With your permission I would like to invite you to watch over my shoulder as I show you how to do the same.

I’ve been teaching my coaching students that pay me \$127 per hour these exact same strategies

And they’ve been getting incredible results and I’m going to show you how to create your own highly profitable list building system that works on 99% auto-pilot.

But fortunately you’re NOT going to pay anywhere the price that my 1 on 1 coaching students are paying. I know that not everyone can afford to work with me personally so I’ve taken all of the information from my \$127 per hour coaching program and put it into a video based interactive training program designed to turn YOU into a list building machine.

And I think the price will truly surprise you, we’ll get to that in just a moment.

But first I’m going to give you the details of exactly what you’re going to get when you claim your spot inside this interactive list building video series.

In addition you'll also receive (I go on to say what they also get, more bullet points to increase value)

Ok, so what's the investment?.....

Well the price is NOT \$147

Even though I think you'll agree that you're getting an insane amount of real actionable information and value here.

The price is also NOT \$97

In fact...I'm NOT even going to charge you \$47

Now this is something I thought really hard about and to tell you the truth I really wanted to price it at \$47 because I know that everyone that signs up is going to get a tremendous amount of value and if you follow the easy step by step instructions then you're going to be able to create your own highly profitable list building system and save yourself months even years of trial and error.

I think you'll agree that's well worth \$47.

But for a limited time I would like to open this up to you for a low one time payment of just \$10.95

For just \$10.95 you can start seeing real results in your business that can be duplicated, multiplied and systematized to put your list building on auto-pilot.

Well that is the fill in the blanks template. All you need to do is fill in the blanks with information regarding your niche/product or service and you are good to go.

If you need to change a couple of extra words so that it fits your product/service then by all means you can do that by make sure you stick to the main sales script and you will be fine.

Other very important things to note:

There are some other very important things that you need to know regarding this template which I will explain below. You must

1. It's important to actually put a lot of your text on the video so people can read it while you are talking in the back ground. This is of course known as a type of a power point presentation. This is proven to increase the time that people stay engaged to your video which will in turn make you more money. If you want to see how it's done take a look at my sales video which you can find in the link in the resource section.

2. Using your own video player and hosting it yourself is crucial. The worst thing you can do is create a good video and then host it on a free platform like youtube or

vimeo. You have absolutely no control over these free video platforms and your sales video can be taken down at any time. What I do is use a tool where I can create all of my own professional looking video players which I am in complete control over. It's very simple to do and if you would like to get more information on exactly how I do this - [Go over to this page here](#)

3. **Set your video to autoplay.** This is something that you also absolutely must do because it will effect your conversions. When somebody comes to your video sales page you need to have the video play straight away with audio. This way it automatically engages with your visitor which means more of your visitors will stick around until the end of the video and ultimately means you make more money.

You can easily do this when creating your own customized video player.

4. **Use a delayed buy button.** So many people have no idea at how effective this strategy actually is. Most people just want to see the price and then they will quickly make up their mind if they want the product or not, but letting people make up their mind before they have watched your entire video presentation will drastically reduce your conversions.

The more of your presentation somebody watched the higher chance you have of that person buying. If you wait until the very end of your video to give them the price then they will of already seen the benefits and features etc of your product so you will stand a much higher chance of making a sales.

The way you can set your buy button to delayed is you can usually set this up within your page set up. I use optimize press 2.0 and within the set up of my sales video page I can set the buy button to appear at a certain time. It doesn't matter what tool you use, this can be set up in pretty much all tools like optimize press.

What you should do is after your sales video is complete, watch and see when you actually give them the price and see what time is on your sales video. You then set that number within your settings of when the buy button should appear. It's very simple to do. You basically want the buy button appear when you finally offer them the chance to buy your product which you will know because you will be following the sales video script which I give you above.

5. **Turn off all buttons on your video except the play and pause option.** Do not what ever you do allow people to fast forward your video. This is a catastrophic mistake.

This is one of the biggest mistakes people make when creating sales videos. If you allow people to fast forward your sales video then you have just wasted all your time creating the video.

Your sales video is ONLY effective and powerful when people actually watch the whole presentation so if you allow people to skip the video when ever they like your conversions are going to suffer badly.

Some people may argue that some visitors may want to fast forward till the end so they can buy now. I never worry about this because if someone wants your product bad enough they will just wait while the presentation finishes.

Not only that but the ones that want to fast forward to the end of your video to buy straight away only count for a very small percentage of people that will end up watching your video. 99% of others will not want to fast forward to the end to buy right there and then so by having no options on your video apart from play and pause will also increase your conversions.

I hope you have enjoyed this report and you can use this sales video template to go out there and increase your conversions and sales when selling products and services online. Don't forget to check out the resources section below if you would like to get extra training.

To your success.
