

Ph.D. in Global Health,

Minor in Faith-Based Healthcare and Development

HBI University

Course Duration: 3 years

Credit Hours: 105

Program Description

The Doctor of Philosophy (Ph.D.) in Global Health at HBIU University is designed to develop experts who address global health challenges through advanced research, policy development, and leadership. This program explores key areas such as epidemiology, health systems strengthening, infectious disease control, and health equity, ensuring that graduates are equipped to create sustainable solutions for improving public health worldwide. By integrating both theoretical knowledge and applied research, students will be prepared to influence global health policies, lead international health organizations, and contribute to innovative healthcare interventions that improve health outcomes in diverse populations.

The Minor in Faith-Based Healthcare and Development specialization provides students with a unique perspective on the intersection of faith, healthcare, and global development. This specialization examines the role of religious organizations in global health initiatives, ethical considerations in faith-based healthcare delivery, and strategies for implementing sustainable health programs in underserved communities. Topics include medical missions, faith-driven humanitarian aid, and the impact of spiritual care on health outcomes. As faith-based organizations play a

significant role in global health efforts, this minor equips students with the skills to design, evaluate, and lead health initiatives that integrate medical care with faith-based values.
