

SL: New Method To Get More Attendees For Your Free MasterClass!!

Hi Christina,

I was flipping through my linkedin feed and I saw your event post about Effective emails in English: I analyse & correct 3 real emails in English.

After finishing reading the description of the event post, I noticed You got only 5 attendees, with a 13,421 following on LinkedIn

It appears that the response to your event has been underwhelming, with only five attendees registered despite your impressive following of 13,421 on LinkedIn.

Even with a massive audience on YouTube, it seems that the event just hasn't gained the momentum that you were hoping for.

But, No problem, That's okay, There is Still Time!! Events Start on 23 March.

I understand how you feel “confused”, you had over 13,000 followers on LinkedIn and a massive audience on YouTube, yet only five people showed up.

You tried to stay positive and hopeful, thinking that perhaps people were simply too preoccupied. To shift your focus away from the recent setback,

Also, you decided to pour your energy into your passion - uploading a new YouTube video. At the end of the video, you made sure to inform your audience of an upcoming event.

Again.. That's Okay!!

Because there is a new idea I have learned by myself and discovered, And I would love to share it with you Through a PDF document.

It Can “Move your followers to the place you want” — like; To Your event -- Im Talking about the idea.

Mind If i share it with you?
