The University of Alabama in Huntsville

A Resolution for an Intermodal Facility Parking Garage Smart Parking System & Technology

Whereas,

1. The Student Government Association (SGA) serves as the official governing body of the student body at The University of Alabama in Huntsville (UAH); and
2. Parking availability within the Intermodal Facility (IMF) Parking Garage is often unclear to students, resulting in unnecessary circling, congestion, and time lost for commuters during peak hours; and
3. A "smart" parking system using entry/exit counters and digital "Spaces Available" signage would improve traffic flow, reduce idling, and enhance the UAH parking experience; and
4. Other institutions, such as Baylor University [1], UT Dallas [2], and UNC Charlotte [3], as well as nearby facilities like Huntsville International Airport [4], have

implemented smart parking systems that display real-time space availability and significantly improve traffic flow and accessibility; and

5. UAH Facilities has expressed interest in the concept and recognizes its potential benefits for campus operations.

Therefore, let it be hereby stated that The Student Government Association of The University of Alabama in Huntsville recommends:

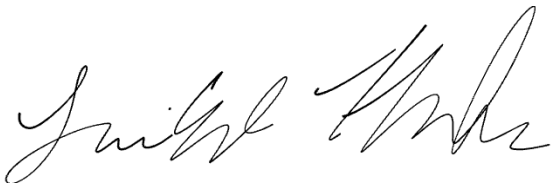

1. That UAH Parking Services, in collaboration with Facilities and SGA, explore the possibility of implementing a Smart Parking Guidance System for the IMF Parking Garage as a long-term campus improvement goal; and
2. That Parking Services review potential vendors, costs, and pilot options to determine a plan; and
3. That SGA remains involved in discussions on system development, student input, and possible funding partnerships.

Furthermore, copies of this resolution shall be sent to the following:

Megan Wilkinson, Director of Student Life & SGA Advisor; Dr. Ronnie Hebert, Dean of Students and VP of Student Affairs; Christian Reed, Chief Facilities Officer; Roger Simmons, Manager of Public Safety
