

Trenton's 60 Day Rainmaker Challenge

Accountability Document

 What is the critical task you completed today that is moving the needle most? 

- Yesterday I thought the website was ready and I could send it to my client, until I checked it with my mobile and found some design and coding problems (mobile optimization issues), it was a tough day, I put so many hours into Fixing the issue, chat gpt could not handle some of the issues, so some parts I progressed slowly.
At the end of the day, I fixed it, even Luke told me about some other problems and strategies I can use, and I fixed them.
I sent it to my client, he liked it. And told me to let's review it

 What were your achievements today? 

- I sent the website to my client and he had a good first impression.

 Twilight review on the day 

- In the copy, you should not put blame on the reader if they are women.(could work for men)
- I should learn lessons, and APPLY them, I have to open my eyes and ears for opportunities and learn how I can use it to my own advantage
- One of the mistakes that I made was that I sat on my chair and did more than 2 hours of GWS. I told myself I refuse to get up until I fix this problem.
- We move forward tho! This is a one way ticket for me, and I know, I'm gonna escape out of matrix forever. LFG ✂️

Wins

- Send the website to the client and he liked it.

Losses

I thought I am gonna spend most of my time for my 2nd client today, but challenges start to show up

Insights learned today and how you will apply them to hit your goal

- I have to lean forward, commit to success
- I have to learn lessons and apply them
- I have to pay more attention to the projects that I am doing and find the challenges and absolutely demolish them.

Tomorrow's tasks

- **First client:**
 - Revision with client
 - USP
 - Things to add/remove from website
 - MLS form
 - Tell him if he can send pre-sale listings/featured listing
- **2nd client:**
 - Continue market research and look for reviews online (Google)
 - Ask my client more info about the business.

 Any other thoughts you have on your current situation and what you need to work on 

- I want to deliver the result to my 2nd client asap, but I need to anticipate the challenges along the way.
