

ICS Weather Stoppage Protocol

There may be times when play needs to be stopped due to a variety of reasons over the course of the tournament.

Lightning & Inclement Weather

- Weather Tracking Apps
 - ***Weatherbug (default tournament app)***
 - Lightning Alarm
- General Guidelines
 - Systems must use a detection radius of 12km to 16km (depending on the system and location of the school).
 - In the event of a lightning strike closer than 15 miles, play will be stopped by the tournament director. An announcement will be made for participants to take shelter in the Sports Pavilion.
 - Once the storm system has moved through (20 minutes or 15 miles), an all-clear announcement will be made.
 - The host AD and tournament director in consultation with the ISSEA AD group will make adjustments to the tournament as needed to ensure the quality of the event is commensurate with the expectations and philosophy of the league.
