

1. Start with a long strip of black paper (a legal size paper cut long way would work great so there are no staples).
2. Cut slits on each side starting from the top of the paper and on the other end starting from the bottom of the paper. This will be what secures the collar together.

3. Use the slits to secure the collar the size needed.
4. (Not pictured) Place a square white sticker (on the black paper) on the last slit that shows in the middle to complete the priest collar.
