

Little note 26.10 after dinner discussion :

We talked about :

- our foodbags (mainly how good they have been),
- the upcoming ending of the summer seasons and the winterseason (soon an enquiry on some particulars coming your way),
- about talkoot (the making visible of all that is being done, and should we have a friendly competition resulting in esim vuoden 2018 satojakoja?!:)),
- about peoples different motivations to join and how to reach people with different motivations (for some perhaps not the food but actually the doing/harrastaminen can be the number one angle),
- about our coop shares- and how they can be co-used,
- about the pool of skills we have as coop members and how we could as in aikapankki make also our needs and skills meet more (something that is integrated in perhaps a dormant way in our talkoot system, lets try to find a way onward with it!),
- info table ("kysy Oma Maasta") during bag pick up got positive feedback
- about fixing and making better the communications to members' friends sharing bags (satojakokaverit)
- about the eating of insects,
- about the different ways to elaborate on Oma Maa's recipy databas (forinstance also to make a category of how one can replace un-ecological elements in well known recipies with Oma Maa products)
