Adjacent Squares

Squares on the edges, top, bottom, left, and right, will use the wraparound logic, so all squares have four adjacent squares.

EACH SQUARE, AND ITS ADJACENT SQUARES, CAN ONLY WIN ONCE.

If your square wins a quarter, and that same square wins again, The first numbers are voided, and you win the larger pot, The voided winnings are moved to the non-winning pool, so we will have more **\$25.00** winners. Adjacent Winners may win more than once, if it is based on different winning numbers.
