Provide a general synopsis of what the course/activity covered/contained.

Research and innovation around strategies to reduce transportation sector emissions while improving the resiliency of transportation assets to the impacts of natural hazards continue to evolve, offering new ways to approach modeling scenarios, risk mitigation, cost-benefit analysis, and transportation asset protection. The new Federal Highway Administration (FHWA) formula funding under the Carbon Reduction Program (CRP) and the Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Program formula funding are estimated to provide Maryland with more than 200 million dollars over the next five years. This funding will allow MDOT to focus on developing strategies that align with federal and State initiatives around climate action. This includes reducing our carbon footprint, delivering resiliency improvements to existing transportation assets and evacuation routes, and improving highway infrastructure life cycle performance. Join representatives from FHWA and MDOT as they share details on the CRP and PROTECT funding and MDOT's Carbon Reduction Strategy and Resilience Improvement Plan development, which just might spark some innovative ideas of your own!

Attach any documentation of participation: i.e. Certificate of Attendance/Completion, transcripts, handouts, tests, programs, outline, reports and other demonstrative evidence of attendance.
