

Computer Application

Week Outline, Week #1

Objectives: (Introduction and Understanding of Semester Goals)

1. Through a series of hands-on activities, students will create, analyze and critique reports, project plans, presentations and other professional communications.
 2. Students will be able to include creative thinking, innovation, inquiry and analysis, evaluation and synthesis of information through each unit of the course.
 3. Students will be able to identify, access and evaluate information to solve real world problems.
 4. Students will continue to use what they learn in the classroom in their future educational or professional career.
