## **DEFYXOBLIVION**

### A MULTIMUSE

#### RULES RULES

1.

Respect one another and yourself.

2.

This blog will contain triggering content. I cannot stress enough how awful some of my muses are. My opinions and views do not align with my muses. The mun is not the muse. I'm not an ancient demon who feeds on pain. I'm not a sadistic geneticist or a sociopathic empath. BEWARE THE TRIGGERS

3.

I consider this blog mildly selective and private. However, anyone may contact me about a thread, and anyone may respond to my opens. I can't guarantee I'll respond to the open but I'll at least take a look at your blog again.

4.

I'll ship, but I only ship chemistry. Sexual content will be present on this blog, but it isn't the focus. I will not rp sexual content with individuals under the age of consent. Where I am, it is eighteen. If it is something else where you are and you are not of or above that age, I expect you to be honest with me and not attempt to subvert this. Please and thank you. I am older than 25 and in case it's not clear I won't write ship content with minors. Please be forthright about this.

**5.** 

If you want to turn a meme or ask into a thread, you're more than welcome to. However, it needs to be put in a new thread. I won't rp reblogged asks and if you reblog one to try and start a thread I'll ask you to repost it on a new thread. In instances where the offense is repeated, I will refuse to turn asks and meme's into threads with you.

6.

Anyone may use the chat function to contact me for whatever reason, but do not abuse it to stalk me or hassle me for threads. I'll get to shit when I get to it, and block you if you get too annoying. There will be no warnings, you should be able to tell the difference between friendly contact and harassment.

*7*.

I do not engage in callout culture, witch hunts and drama. This is a space for me to relax and have fun, and if you come to me demanding I cease interaction with a roleplay partner you are the one I'll cut contact with. Keep it to yourself.

8.

Non-rp blogs that interact with material on my blog will, with almost one hundred percent certainty, be immediately blocked. Ain't nobody got time for that.

9.

This blog operates primarily on the queue. It will likely appear like I'm not posting with frequency, more than once a day, but I assure you I'm probably stalking the dash. I frequently shit post and write meta content.

10.

I like to liveblog comics here, mostly Marvel, and if you don't want to be spammed by random bursts of some nerd screaming about fictional characters you can blacklist Rave To The Grave..
