

Medications and Supplies

1. Compile a list of local or online sources that will provide medications for use by midwives, as well as the supplies needed to administer them. Include the business name, location, website, and phone number. If this may not be in your scope of practice as a CPM in your state, consider that the laws may change some day, so know what options may be available to you. (10 pts.)

- Needles and Syringes
 - In His Hands, Website: <https://www.inhishands.com/midwifery-supplies/>, Phone: 800-247-4045 10am-4pm CST, Text: 512-877-4356, Email: Help@Inhishands.com
 - Cascade Health Website: <https://cascadehealth.com/medical-midwifery-equipment-instruments-supplies>, Phone: 800-443-9942
- Medications
 - Precious Arrows, Website: <https://www.preciousarrows.com/default.asp>, Phone: 877-423-7796

2. Identify the average cost of 3 of the following medications: pitocin, methergine, misoprostol, Rh immunoglobulin, erythromycin eye ointment, vitamin K injectable, or lidocaine. Be sure to include quantities (for example, if the price is for a box of 25 items or if the vials are 1ml or 10ml) and shipping & handling fees, if applicable. Ask your preceptor or other people to help you access this information, if needed. (10 pts.)

- Methergine Injectable Ampule, Box of 10, Exp. 3/25, \$310.00
- Rhogam, 300 mcg, Exp. 3/25, \$140.00
- Pitocin Injectable, 1mL SDV, Box of 25, Exp. 6/24, \$200.00
