1. Introduction

Introductory part mainly contains: (1) the problem of research; (2) knowledge and problem-solving plan; (3) the formulation of research objectives; (4) a summary of theoretical studies related to the problems examined. In this section sometimes also loaded hopes for the results and benefits of research and typed with 1 spacing.

For an article that will be published in the journal, the detailed rules following the provisions of article format on the journal article format. Articles typed on A4 paper and use top, bottom, left, and right margin 2,5 cm. The template for this article format created in MS Word 2010, and then stored in docx format. No spacing is required upper, lower, sight and left sides of the paper. This template allows the author to prepare articles in accordance with the rule relatively quickly and accurately.

1.1. Research Questions

1.2. Hypothesis (if any)

2. Review of Literature

2.1. Review of theories on your variables

2.2. Review of Previous Studies

3. Methods

Quantitative Approach

3.1. Design

3.2. Sample

3.3. Instrument (including validity and reliability of your instrument)

3.4. Data Collection

3.5. Data Analysis

Qualitative Approach

3.1. Design

3.2. Participants

3.3. Data and Sources of Data

3.4. Data Collection

3.4.1. Observation

3.4.2. Interview

3.4.3. Document Analysis

3.5. Data Analysis

4. Findings and Discussion

This section is the main part for the author state the result but does not interpret them. Results are the answers of your research questions, and discussion interprets your results. Discussion should compare your recent findings with previous studies to show your gaps and novelty. If you have subfield you can write them as follows:

4.1 The title of your Subfield or sub-heading

If you have other subfield or sub-heading that still related, you can add more like this;

4.1.1 The title of your Subfield or sub-heading

Here you can continue to wrote

4.2 Other Subfield or sub-heading

4.2.1 other title of your Subfield or sub-heading

Here you can continue to wrote

The description of the findings can be in the form of tables and images with sequential numbers, furthermore, look our example;

Table 1. Example (use times new roman with 12 font size)

No	example	Examples
1	Please don not use vertical lines	And use italic font for indicate some terms after that make the table align left.

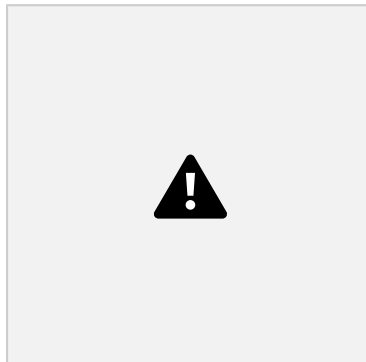

Figure 1 example (use times new roman with 12 font size and make align left)

5. Conclusion

Please fill out all the contents of your article, if there is a subfield to adjust the format of the example above. Conclusion is not replication of your results. The conclusion indicates naswers to your research quesions, shows your limitation of your study, porpose suggestions for the future research and highlight your novelty.

6. REFERENCES

*Please type your references with *APA STYLE 7 Edition* using *Mendeley*

Must contain the recent references from journal articles, and include 2 references from this journal or groups.
