

HERO BLOCK

Reliable roofing for homes and businesses in Europe

We deliver reliable roofing systems for residential and commercial properties — with a focus on technology, precision, and durability. Our approach is transparent: we comply with safety standards and maintain full oversight at every stage — from material selection to final project handover.

 [CTA]: Request a consultation

SERVICES OVERVIEW

Flat Roofs

We design and install reliable flat roofing systems for private homes, apartment buildings, and industrial facilities. Turnkey solutions — from insulation to waterproofing and drainage.

Pitched Roofs

We install new pitched roofs and upgrade existing ones. We work with tile, metal shingles, and other finishes, ensuring insulation, durability, and a clean architectural look.

Roof Maintenance

Scheduled inspections, leak prevention, minor repairs, and service plans that extend your roof's lifespan. Flexible formats — from one-off interventions to ongoing maintenance contracts.

 [CTA]: Speak to our team

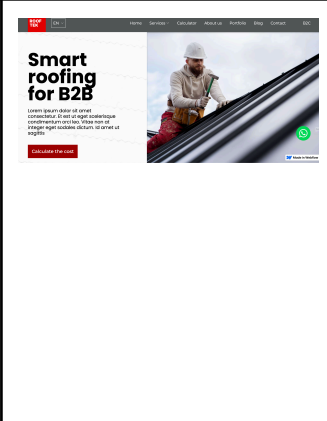

About Us

For over 15 years, we've been building reliable roofing systems for residential and industrial projects across Europe. During this time, our teams have completed more than 2 million square meters of roofing — from private homes to complex industrial facilities.

	We operate in Belgium, the Netherlands, France, Denmark, and the Baltic countries, combining local expertise with strict European quality standards. Our team consists of certified professionals who take full responsibility for the result. We don't chase volume. We build with the kind of quality that brings clients back — and earns their recommendation.  [CTA]: Discuss your project with our team
	Our Values Quality & Safety We don't compromise when it comes to technical standards, materials, or quality control. Every roof we build is made to perform — not just in the first year, but for years to come. Transparency & Integrity You always know what you're paying for. Every detail is clear — from the number of fasteners to the cost of each layer. We offer an honest picture, so your decisions are based on facts, not promises. Partnership We build relationships on trust, not just contracts. Whether it's a client, subcontractor, or architect — we work as one team, united by a shared goal: a reliable result. Proactivity We don't wait for problems to arise — we anticipate them. We think ahead, offer solutions early, and act in the best interest of both the project and the client.  [CTA]: Request a tailored consultation
	Stages of Cooperation 1. Request & Initial Consultation You submit a request — we get in touch, clarify the scope, and arrange an on-site visit. 2. Assessment & Proposal

	Our specialist inspects the site, records key parameters, and identifies any structural specifics. You receive a detailed and transparent quote — with no hidden costs. 3. Planning & Agreement We select the right materials, agree on deadlines, logistics, and project scope. All terms are clearly set out in the contract. 4. Execution Our team arrives on the scheduled day. Work is carried out under the supervision of a project foreman. Cleanliness and order on site are part of our standard — not an extra. 5. Handover & Ongoing Support Upon completion, we provide a final report, maintenance guidelines, and stay in touch for technical support if needed.  [CTA]: Request a quote
	Numbers That Speak for Experience Over the past 15 years, we've installed more than 2,000,000 m² of roofing. From small private homes to large-scale industrial facilities — every square meter reflects our clients' trust, our responsibility, and quality control at every stage.  [CTA]: Explore completed projects
	Get a Roof Cost Estimate in Just 2 Minutes Our calculator helps you estimate your roofing budget before the work even begins. Just enter the basic parameters — and receive an instant preliminary quote.  [CTA]: Calculate your roof cost

 The image shows the top section of a website. On the left, there's a text block titled 'Smart roofing for B2B' with a sub-headline and a 'Calculate the cost' button. On the right, there's a large image of a worker on a roof with a WhatsApp icon in the bottom right corner.	Roofing Solutions for Developers and Businesses We provide a full cycle of roofing services for new builds and renovations — from technical consulting to final project handover. We strictly adhere to timelines and regulations, with every stage documented.  [CTA]: Request a commercial estimate
 The image shows a website header with a navigation bar. Below it, there are three service categories: 'Pitched roofs', 'Flat roofs', and 'Maintenance', each with a small icon and a brief description. At the bottom, there's an 'About us' section with a photo of a worker.	Services Overview Flat Roofing Installation of new flat roofing systems and renovation of existing ones for industrial, commercial, and residential developments. We work with PVC, EPDM, and bitumen membranes — accounting for load requirements, drainage, and thermal performance. Pitched Roofing Design and installation of new pitched roofs and upgrades of existing systems. We use metal tiles, ceramic, and composite materials. Each solution is selected based on technical specifications and project budget. Maintenance & Repair Site inspections, scheduled servicing, and urgent repairs. We provide defect reports, official documentation, photo reports, and maintain warranty compliance.  [CTA]: Request a commercial proposal

About us

We provide reliable and sustainable roofing solutions for your property and business. Quality comes first, and we go the extra mile to ensure that every project is completed on time and on budget.

About Us

We've been in the roofing industry for over 15 years and have delivered more than 2,000,000 m² of installed systems. Our projects span across Western and Northern Europe — from Belgium and the Netherlands to France, Denmark, and the Baltic region. Our portfolio includes logistics hubs, industrial facilities, residential developments, office parks, and commercial properties.

Our clients receive more than a technically sound solution — they benefit from comprehensive support at every stage, from early cost planning to handover and post-warranty service.

 [CTA]: Explore our case studies

Our values

Our Values

1. Project Analysis

We review your specifications, structural plans, and site conditions. We audit the proposed solution and suggest optimisations where applicable.

2. Budgeting & Logistics

We develop a transparent cost breakdown, align timelines and milestones, and calculate delivery and material supply logistics.

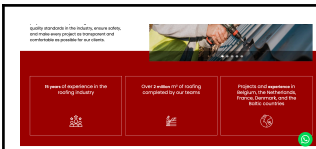

3. Execution & Quality Control

A dedicated crew works on site under the supervision of a senior foreman. All work stages are documented with interim inspections and photo records.

4. Handover & Support

Upon completion, we provide a full set of documents: completion certificates, technical passports, and operating manuals. If needed, we carry out regular site inspections and offer ongoing technical support.

 [CTA]: Discuss your project with us

Our Principles

- **Quality & Compliance**
We follow all technical standards, specifications, and agreed timelines — without compromise.
- **Full Documentation**
Every stage is recorded with official documents: certificates, budgets, photo logs, and detailed reports.
- **Transparency**
You always know where your project stands — no surprises, no blind spots.
- **Flexibility**
We adapt to your processes, schedules, and project management systems.

 [CTA]: Schedule an online meeting

Stages of Cooperation

1. Getting in Touch

Submit a request via our website, call us, or message on WhatsApp — we'll respond promptly.

2. On-Site Inspection

One of our specialists visits your site to assess the scope and inspect the roof if required.

3. Quotation & Scope

We send you a detailed quote with pricing, scope of work, and project timeline.

4. Agreement & Launch

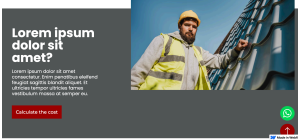

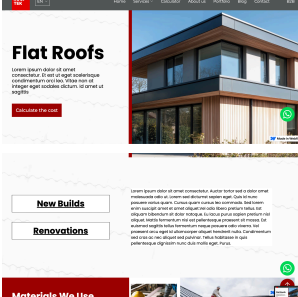

Once the terms are agreed, we sign the contract and lock in the schedule.

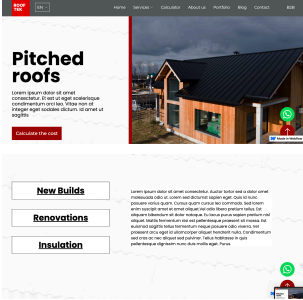

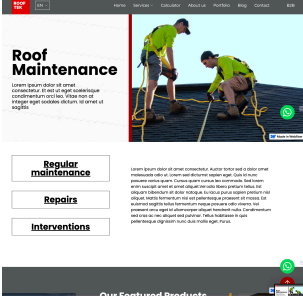

5. Execution Phase

Our crew begins work using certified materials and in full compliance with technical standards.

6. Handover & Documentation

We deliver the finished project, provide all necessary documents, and give maintenance guidance if needed.

Services pages	
	Flat Roofs A flat roof isn't just a surface — it's a critical structural component. We design and install systems tailored to the local climate, building architecture, and specific project requirements. We work with PVC, EPDM, and bitumen membranes, selecting materials based on mechanical and thermal loads, roof pitch, operating conditions, and insulation needs. For high-load areas — such as terraces, service zones, and green roofs — we build multilayer systems with reinforcement and puncture protection. If your project is still in the planning stage, we can step in to assess the technical design. For renovations, we evaluate the existing structure and propose modern, cost-effective alternatives.

	Our flat roofing portfolio includes residential developments, retail buildings, warehouses, office spaces, and industrial sites. We manage the full cycle — from technical assessment to system delivery and final commissioning.  [CTA]: Discuss your project with an engineer
	Pitched Roofs A pitched roof is more than just a covering — it's a defining architectural feature and the building's first line of protection against moisture, cold, and wind. We build pitched roofs that retain their shape, watertightness, and appearance for decades. We carry out the installation of new roof structures, renovation of existing ones, and replacement of individual components or complete systems. Our solutions are suitable for private homes, apartment buildings, and commercial properties. We work with metal tiles, composite and natural materials, as well as standing seam systems. Installation is performed in full compliance with all building regulations — from pitch angle and ventilation to waterproofing and snow load requirements. During renovation, we inspect structural elements, reinforce the frame if needed, and replace battens. Our scope also includes integration of drainage systems, skylights, insulation, and safety elements. The result is a durable, technically sound roof that complements the building's architecture.  [CTA]: Request a tailored proposal
	Roof Maintenance Even the most durable roofing systems require regular attention. Precipitation, temperature fluctuations, UV exposure, and mechanical impact inevitably take their toll over time. Our maintenance services are designed to prevent damage, extend service life, and reduce the risk of costly emergencies.

	As part of our service, we: • perform visual and technical inspections; • clean roof surfaces, gutters, and downspouts; • detect and fix minor defects; • provide photo-documented reports for the client. For high-load facilities — such as industrial sites, residential complexes, and shopping centers — we offer scheduled maintenance under a customized service plan. This is especially important for warranty-protected systems, where even minor damage can void coverage and compromise long-term protection. One-off repairs are also available: sealing of joints, membrane replacement, restoration of flashing and parapet details. Our job is to prevent problems before they occur.  [CTA]: Book a maintenance inspection

HERO-БЛОК (Главная, Русский)

Надёжная кровля для дома и бизнеса в Европе

Реализуем надёжные кровельные системы для частных и коммерческих объектов — с акцентом на технологичность, точность и долговечность. Работаем прозрачно, соблюдаем стандарты безопасности и обеспечиваем полный контроль на всех этапах — от выбора материалов до финальной сдачи объекта.

 [CTA]: Оставить заявку на консультацию

Обзор услуг

Плоские крыши

Проектируем и монтируем надёжные плоские кровли для частных домов, многоквартирных зданий и промышленных объектов. Предлагаем решения под ключ — от утепления до гидроизоляции и дренажа.

Скатные крыши

Устанавливаем новые скатные кровли и реконструируем существующие. Работаем с черепицей, металлочерепицей и другими покрытиями. Обеспечиваем теплоизоляцию, прочность и эстетичный вид.

Техническое обслуживание

Проводим регулярные осмотры, устраняем протечки и дефекты, продлеваем срок службы крыши. Гибкий подход — от разового ремонта до обслуживания по договору.

 [CTA]: Получить консультацию

О нас

Уже 15 лет мы строим надёжные крыши для жилых и промышленных объектов по всей Европе. За это время наши команды реализовали более 2 миллионов квадратных

метров кровельных систем — от компактных частных домов до сложных промышленных зданий.

Мы работаем в Бельгии, Нидерландах, Франции, Дании и странах Балтии, объединяя местный опыт с европейскими стандартами качества. Наша команда — это сертифицированные специалисты, которые берут на себя полную ответственность за результат.

Мы не гонимся за объёмом. Мы строим так, чтобы к нам возвращались — и нас советовали другим.

● [СТА]: Обсудить проект с нашей командой

Наши ценности

Качество и безопасность

Мы не допускаем компромиссов в том, что касается технических стандартов, материалов и контроля. Мы делаем всё, не подводи́ла ни сразу после монтажа, ни через десять лет.

Прозрачность и честность

Вы заранее знаете, за что платите. Все расчёты открыты: от количества крепежей до стоимости каждого слоя. Даём честную картину происходящего — чтобы вы принимали решения на фактах, а не на обещаниях.

Партнёрство

Мы выстраиваем отношения не на бумаге, а на доверии. С заказчиками, подрядчиками и архитекторами мы действуем как одна команда, объединённая общей целью — надёжным результатом.

Проактивность

Мы не ждём, пока появится проблема. Предлагаем решения до того, как они станут необходимыми. Думаем на шаг вперёд — в интересах проекта и клиента.

● [СТА]: Получить персональную консультацию

Этапы сотрудничества

1. Заявка и первичная консультация

Вы оставляете заявку — мы связываемся, уточняем задачу и договариваемся о выезде на объект.

2. Оценка и предложение

Наш специалист проводит осмотр, фиксирует параметры, выявляет особенности конструкции. Затем вы получаете подробную и прозрачную смету без скрытых пунктов.

3. Подготовка и согласование

Мы подбираем материалы, согласовываем сроки, логистику и финальный объём работ. Всё фиксируется в договоре.

4. Выполнение работ

Бригада выходит на объект в установленный день. Работы ведутся под контролем прораба. Чистота и порядок на объекте для нас — часть стандартов, а не дополнительная услуга.

5. Приёмка и сопровождение

После завершения мы передаём акт выполненных работ, рекомендации по эксплуатации и остаёмся на связи для технической поддержки.

☐ [CTA]: Оставить заявку

Цифры, за которыми стоит опыт

За последние 15 лет мы смонтировали более **2 000 000 м² кровельного покрытия**. От небольших частных домов до крупных промышленных объектов — каждый квадратный метр отражает доверие клиента, нашу ответственность и контроль качества на каждой стадии.

☐ [CTA]: Ознакомиться с реализованными проектами

Рассчитайте стоимость вашей крыши за 2 минуты

Простой калькулятор поможет понять ориентировочный бюджет ещё до начала работ. Укажите базовые параметры — и получите примерную стоимость прямо сейчас.

☐ [CTA]: Рассчитать стоимость кровли

HERO-БЛОК (B2B)

Кровельные решения для девелоперов и бизнеса

Обеспечиваем полный цикл кровельных работ для новых объектов и реконструкций — от технической консультации до сдачи объекта. Чётко соблюдаем сроки, нормативы и фиксируем каждый этап в документации.

☐ [CTA]: Получить смету

ОБЗОР УСЛУГ

Плоские кровли

Монтаж новых кровель и реконструкция существующих систем для промышленных, коммерческих и жилых объектов. Работаем с ПВХ, EPDM и битумными мембранами. Учитываем нагрузки, дренаж, теплопотери.

Скатные кровли

Реализуем новые конструкции и обновляем существующие кровельные системы. Работаем с металлочерепицей, керамикой, композитными материалами. Подбираем решение в соответствии с техзаданием и бюджетом.

Техобслуживание и ремонт

Обследование объектов, обслуживание по графику, оперативные вмешательства. Составляем дефектные ведомости и акты, высылаем фотоотчёты, фиксируем гарантийные обязательства.

 [CTA]: Заказать коммерческое предложение

О НАС

Мы работаем в кровельной отрасли более 15 лет и за это время реализовали свыше 2 000 000 м² покрытий. Наши объекты расположены по всей Западной и Северной Европе — от Бельгии и Нидерландов до Франции, Дании и стран Балтии. В портфолио — логистические хабы, промышленные комплексы, жилые кварталы, офисные центры и коммерческая недвижимость.

Клиенты получают не только технически выверенный результат, но и сопровождение на каждом этапе — от предварительных расчётов до сдачи объекта и постгарантийной поддержки.

 [CTA]: Ознакомиться с кейсами

НАШ ПОДХОД

1. Анализ проекта

Изучаем ТЗ, конструктив, условия участка. Проводим аудит решений и предлагаем оптимизацию, если она возможна.

2. Смета и логистика

Формируем прозрачный бюджет. Согласовываем график и этапность работ. Просчитываем логистику и подачу материала.

3. Работы и контроль качества

Выделенная бригада выходит на объект под руководством старшего мастера. Ведётся фотофиксация и промежуточный контроль.

4. Сдача и сопровождение

После завершения работ передаём комплект документов: акты, технические паспорта, инструкции по эксплуатации. При необходимости — проводим регулярные осмотры и предоставляем техническую поддержку.

 [CTA]: Обсудить условия сотрудничества

НАШИ ПРИНЦИПЫ

- **Контроль и качество.** Соблюдаем технологии, стандарты и сроки.
- **Документальное сопровождение.** Каждый этап фиксируется актами, сметами, фото и отчётами.
- **Прозрачность.** Заказчик всегда знает, на каком этапе находится проект.
- **Гибкость.** Подстраиваемся под ваши процессы и графики.

● [СТА]: Назначить онлайн-встречу

Этапы сотрудничества

1. Первая связь

Оставьте заявку через сайт, позвоните нам или напишите в WhatsApp — мы свяжемся с вами в ближайшее время.

2. Выезд и оценка

Наш специалист приедет на объект, чтобы изучить задачу и осмотреть крышу, если это необходимо.

3. Коммерческое предложение

Вы получите расчёт стоимости с описанием объёма работ, сроков и технических параметров.

4. Договор и старт проекта

После согласования условий подписываем договор и фиксируем график.

5. Выполнение работ

На объект выходит бригада. Все работы выполняются по стандартам и с применением сертифицированных материалов.

6. Завершение и приёмка

Мы сдаём готовый объект, предоставляем документацию и при необходимости — рекомендации по обслуживанию.

● [СТА]: *Связаться с нами*

Цифры, за которыми стоит опыт

Страницы услуг

Плоские крыши

Надёжная плоская крыша — это не просто кровля, а элемент конструктивной безопасности. Мы проектируем и реализуем системы, адаптированные к климату, архитектуре здания и условиям конкретного объекта.

Работаем с ПВХ, EPDM и битумными мембранами. Каждое покрытие подбирается с учётом механических и температурных нагрузок, угла уклона, условий эксплуатации и требований к теплоизоляции. Для объектов с интенсивной нагрузкой (террасы, техзоны, зелёные крыши) закладываем многослойные системы с армированием и защитой от пробоя.

Если проект на стадии планирования — подключаемся для оценки технической части. Если идёт реконструкция — помогаем переоценить старое решение и предложить новое, экономически и технически обоснованное.

В числе наших проектов — жилые комплексы, торговые объекты, склады, административные и промышленные здания. Берём на себя весь комплекс работ — от диагностики объекта до полной сдачи системы.

Скатные крыши

Скатная кровля — это архитектурный элемент, который формирует облик здания и определяет его защиту от влаги, холода и ветра. Мы создаём крыши, которые сохраняют форму, герметичность и внешний вид на протяжении десятилетий.

Выполняем монтаж новых конструкций, реконструкцию старых крыш, замену отдельных элементов или полной кровельной системы. Предлагаем решения как для частных домов, так и для многоквартирных и коммерческих объектов.

В работе используем металлочерепицу, композитные и натуральные материалы, а также фальцевые решения. Монтаж выполняется с учётом всех нормативов — от уклона и вентиляции до гидроизоляции и снеговой нагрузки. При реконструкции проверяем несущие элементы, при необходимости усиливаем каркас и обновляем обрешётку.

В рамках проекта также интегрируем водосточные системы, мансардные окна, теплоизоляцию и элементы безопасности. Результат — надёжная кровля, рассчитанная на долгий срок службы и соответствующая архитектуре здания.

Техническое обслуживание кровли

Даже самая прочная кровля требует регулярного внимания. Осадки, перепады температур, ультрафиолет и механические воздействия со временем дают о себе знать. Мы предлагаем обслуживание, которое предотвращает повреждения, продлевает срок службы и снижает риск аварийных затрат.

В рамках сервиса мы:

- проводим визуальные и технические осмотры;
- очищаем покрытия, желоба, водостоки;
- обнаруживаем и устраняем мелкие повреждения;
- составляем отчеты с фотофиксацией для клиента.

Для объектов с повышенной эксплуатационной нагрузкой — промышленных зданий, жилых комплексов, торговых центров — предлагаем сервисное обслуживание по индивидуальному графику. Это особенно важно для кровель с гарантийными условиями, где даже незначительное повреждение может привести к утрате защитных свойств и аннулированию гарантии.

Отдельно можно заказать разовый ремонт: герметизацию стыков, замену гидроизоляционного слоя, восстановление примыканий и парапетов.

Наша задача — предотвратить проблему ещё до того, как она возникнет.

Портфолио (Portfolio)

Реальные масштабы наших проектов

Мы не работаем с биржевыми макетами или виртуальными визуализациями — все, что вы видите ниже, реализовано нашей командой. Это жилые комплексы, логистические терминалы, частные дома, административные здания и производственные объекты в Бельгии, Франции, Нидерландах, Дании и странах Балтии.

Для каждого проекта мы выбираем материалы с учетом технического задания, условий эксплуатации и бюджета. В процессе фиксируем ключевые этапы: от подготовки к финальному слою гидроизоляции.

Наше портфолио — это история решения, в котором объединены архитектура, технология и ответственность.

О компании (About Us)

Решения по кровле стоит доверять тем, кто подтверждает свою репутацию делом

Уже 15 лет мы создаем кровельные системы для частного и коммерческого строительства в разных странах Европы. За это время нашими усилиями построено более 2 миллионов квадратных метров — от компактных домов до масштабной инфраструктуры.

Мы работаем в Бельгии, Нидерландах, Франции, Дании и странах Балтии, объединяя локальную специфику с европейскими стандартами монтажа и безопасности. В центре нашей работы клиент и его задачи: соблюдение сроков, четкость в расчетах, фиксация каждого этапа и постоянная обратная связь.

Наша команда — это инженеры, мастера, логисты и координаторы, которые думают не шаблонами, а категориями проекта. Каждый из них отвечает за свой участок и делает всё, чтобы результат соответствовал ожиданиям — а лучше, превосходил их.

Блог (Blog)

Практические советы, разбор решений и технологии, которым можно доверять

В этом разделе мы делимся тем, что знаем по опыту: как выбрать кровлю для частного дома, на что обратить внимание при реконструкции, как избежать лишних затрат на обслуживание или какие нюансы следует учесть при работе с плоскими крышами в промышленном строительстве.
