(unknown. XP and GP values by DM Superelf.)

This is a fan which blows killing feverish chills and has the effectiveness of a *sleep* spell, these chills kill in 5 melee turns.

(DM Superelf Note: The area of effect of this fan is a 20' x 20' roughly square area just in front of the fan (not necessarily in front of the fan user). In anyone's hands other than Lu Yueh it is usable only once/day).
