So, Tell Me a Little About Yourself...

Please take some time to thoughtfully answer these questions which will help me begin to get to you know. I will read what you write and care about who you are!

1. What do you most look forward to when you wake up in the morning and why?
2. What do you like to do in your free time and why?
3. How do you feel about science or your previous science courses and why?
4. When you think about life after you graduate from high school what career sounds good to you and why?
5. Tell me something unique or special about yourself.
