MAGA IS Rigging the Midterm Election

FIGHT BACK
Virginia

Vote YES for Temporary Redistricting
April 21

Early Voting Starts March 6

1. **Levels the Playing Field for the National 2026 Congressional Elections**
   Trump has successfully pressured Republican states to redistrict ahead of the 2030 census to hold onto power despite his massively unpopular agenda – Virginia has the opportunity to help level the playing field.
2. **Pushes Back on Attacks on Our Democracy, Healthcare and Public Safety**
   Republicans are destroying our economy, driving up prices, breaking our healthcare system, and allowing ICE to terrorize our communities. Now they want to take our vote and weaken our democracy. This election offers Virginians the opportunity to stop them.
3. **Ensures Voters have the Power to Decide, Not Politicians**
   Unlike Texas, Missouri, North Carolina and Ohio, where redistricting decisions were made without voter consent, Virginia puts the decision to redistrict directly in the hands of voters. It is a declaration that political power should flow from the people.
4. **Responds Directly to National Republican Election Rigging**
   Virginia's redistricting is a response to national Republican rigging to advance their destructive agenda and secure Trump's unchecked power. Virginia has a chance to take a stand and stop Trump in his tracks.
5. **Expires in 2030, Only a Temporary Measure for Unusual Times**
   The Amendment provides for the use of emergency temporary congressional maps until after the 2030 census when the Virginia Independent Redistricting Commission will do its regular redistricting job.
