

Hey Aron,

Your expertise places you among the world's best as featured in Ape to Gentleman.

The transformations and testimonials on your Instagram totally reflects that.

I checked your website earlier today, and as soon as I opened it, I expected an Opt-in page.

Usually, the top performing and high conversion websites, in medical businesses, leverage Opt-in pages to increase their leads and patients.

Then, proceeding to guide the patients to schedule a consultation and eventually their hair restoration procedure.

Since I like the competitiveness and passion you have for your art, I created a Free Opt-in page and Email Sequence for you.

The link is attached to this DM.

There are 3 other major website optimization techniques, which I constantly notice are used in high performing web pages.

Which increases the time patients stay on the website, the traffic and number of booked consultations.

I would really like to share them with you.

And since you are a competitive person, I am sure you always strive to be the best.

So just leave a reply to this DM and I will share those techniques with you.
