

My experience with slate

Before I begin I should probably say that this doc covers grooming and hypersexuality (and also this is my first time making a doc like this so if I make some errors in writing then sorry)

Hi Neon here I kinda wanted to come here to talk about my experiences with one of my old friends slate the ghostie and about how they groomed me into hypersexuality and some other stuff

also if you want to know more info on who slate really is i highly recommend checking out the slate doc made by a group of other people ([☰ Slate Doc](#))

(Just a disclaimer the segments might not be that long because this is my first time making something like this so I hope you understand that)

The beginnings

I meet slate back in 2020 and it was we were just normal friends at that time (don't really know how to explain everything before 2023 so just know me and slate were just friends during that time but me and slate had a falling out in early 2023 until late april 2023)

During May of 2023 that's when me and slate had nsfw interactions and we mostly did erps in dms (btw slate was 17 at that time and i was 15 at that time) they were mostly softcore erps but it's weird that an almost 18 year old would do this shit with someone who is 2 years younger then her anyways (btw me and slate did rps from may of 2024 all the way to April 2024)

guilt tripping

there were some moments in this “friendship” that slate would ask for art alot even to the point of me thinking that she was forcing me to make nsfw art and when I brought that up to her she tried to guilt trip me which is just really disgusting to think about

There was also a moment where after not making art for slate for a while she tried to guilt trip me again into making her a new drawing and then when I made it she asked me to make her breasts bigger and I did so because I was her friend and I didn't want to disappoint her (all the times of that and the topic before this one are in this drive ( The screenshots) (also btw slate deleted her discord account so just know deleted user is slate in the screenshots)

The private server

This next topic is about the private server me and slate had and it was weird to say the least

This was brought up in slate doc itself but in that server me and slate shared pics and there were alot of nsfw interactions in there (I can't get screenshots because slate told me to delete that server before she got called out which is unfortunate)

Now let me just address something

because of me doing that with slate it let me to being hypersexual to the point that I sent someone a pic of myself due to me being heavily normalized by it from slate

I am genuinely sorry for what I did and I'm learning to improve myself from what I did hope you understand

Conclusion

Hope this document explains my experience with slate alright enough
and to stay away from slate at all cost

If your a victim of grooming and gen

That's all I have to say for now
Bye and I hope you have a good day
