

Google maps are easy and accessible and customizable.

There is a 5000 copy limit yet it is not likely that Google would pay attention to.

Before you or an artist starts with design, it's important to decide how many maps, the regions, style and the type of info. Color vs. BW. Should have credit line and date, at least the year created. Jane Doe/2021/via Google Maps

Create lists of destinations and consider what to show. What is helpful to a reader today who may travel, even in armchair? One example in a pointer/knockout box:

*Port Au Prince, Haiti*

*Seeking xx snakes (purpose of visit)*

*"I almost died." (Highlight of your experience)*

I set up news graphics departments for New York Times Co. that created maps and charts every day.
