To whomever it may concern,

Hello, I am a nctzen, a fan of the group NCT.

I have been witnessing that the Japanese member of your group NCT "Yuta Nakamoto" has been receiving a lot of malicious comments/contents lately.

It's not the first time I am seeing this but recently it's too frequent. He has been subjected to ample amounts of serious threats to harm him/unsavory remarks and it's making me and other fans really concerned for his safety.

Therefore, I urge you to take action against the malicious comments/content against Yuta. An account has released private info, such as where NCT live and more. Please take immediate action and help protect the artists.

Here are the details of the report :
