

Privacy Policy for BG Remover

Effective Date: March 21, 2026

BG Remover ("we," "our," or "us") is committed to protecting your privacy. This Privacy Policy explains how your information is handled by Yashveer Singh (the "Developer") when you use the BG Remover mobile application (the "App").

By accessing or using the App, you agree to this Privacy Policy. If you do not agree with our policies and practices, please do not use the App.

1. Information We Collect

BG Remover is designed with a privacy-first approach. We collect as little information as possible.

A. Information You Provide to Us

BG Remover does not require you to create an account. We do not collect your name, email address, or any personal profile information during normal use of the App.

B. Automatically Collected Information

- **Device Information:** We may collect basic technical information about your device, such as device model, operating system version, and app version, solely for the purpose of diagnosing crashes and improving app stability.
- **Usage Data:** We may collect anonymized, aggregate data about how features are used (such as how often background removal is performed) to help us improve the App. This data cannot be used to identify you personally.

C. Photos and Camera

- **Photo Library Access:** The App requests access to your photo library only when you choose to select a photo for processing. We do not scan, browse, or access any photos other than the one you explicitly select.
 - **On-Device Processing Only:** All background removal is performed entirely on your iPhone using Apple's Vision framework and Neural Engine. Your photos are never uploaded, transmitted, or stored on any external server.
 - **Saved Results:** When you tap "Save PNG," the processed image is saved directly to your Photo Library on your device. We do not retain a copy.
-

2. How We Use Your Information

We use the limited information collected solely for the following purposes:

- **App Functionality:** To process the photo you select and return a background-removed result entirely on your device.
 - **Crash Reporting & Stability:** To identify and fix technical issues that may affect your experience.
 - **App Improvement:** To understand which features are most useful and improve the App over time using anonymized, aggregate data.
-

3. Data Sharing and Third-Party Services

We do not sell your personal data. We do not share your photos with any third party.

Because all image processing happens on-device, your photos never leave your iPhone. We do not use any third-party AI cloud services to process your images.

We may use the following minimal third-party services:

Service Provider	Purpose	Data Shared
Apple App Store	App distribution and in-app purchases (if applicable)	Managed entirely by Apple
Crash reporting tool (e.g. Firebase Crashlytics)	App stability and diagnostics	Anonymized crash logs, device info

4. Data Retention

Since BG Remover does not collect personal data or require an account, there is no user data stored on our servers to retain or delete.

- **Photos:** Never stored by us. All processing happens on your device.
- **Anonymized analytics:** Retained in aggregate form only, not linked to any individual user.

If you wish to remove the App and all associated local data, simply delete BG Remover from your iPhone. This removes all app data from your device entirely.

5. Security

Because BG Remover processes all data on-device and does not transmit your photos or personal information to any server, the risk of a data breach involving your photos is eliminated by design. Standard iOS sandboxing and security protections apply to all data stored locally on your device.

6. Children's Privacy

BG Remover is not directed at children under the age of 13. We do not knowingly collect personal information from children. If you believe a child has provided personal information through the App, please contact us and we will take appropriate steps to address it.

7. Your Rights

Since we do not collect personal data tied to your identity, there is generally no personal data for us to provide, correct, or delete on our end. However, you always have full control:

- **Photos:** Remain on your device at all times. You control them through your iPhone's Photos app.
 - **App Data:** Can be fully removed by deleting the App from your device.
 - **Permissions:** You can revoke photo library access at any time via Settings → Privacy & Security → Photos on your iPhone.
-

8. HealthKit and Biometrics

BG Remover does not integrate with Apple HealthKit and does not collect any biometric data such as face scans, heart rate, or any other health-related sensor data.

9. Changes to This Privacy Policy

We may update this Privacy Policy from time to time. Any changes will be posted on this page with an updated Effective Date at the top. You are advised to review this Privacy Policy periodically for any changes. Continued use of the App after changes are posted constitutes your acceptance of the updated policy.

10. Contact Us

If you have any questions or concerns about this Privacy Policy, please contact us at:
