1. Introduction/Pendahuluan

Introduction consists of (in sequence) general background, state of the art as the basis for the scientific novelty statement of the article, scientific novelty statement, and research problem or hypothesis. In the end, introduction should mention the purpose of article review. Literature review is not allowed in the scientific article format, so it is replaced by the state of the art to prove the novelty of the article..

2. Research Methods/Metode Penelitian

Research Methods is implemented to solve problems, including analytical method. The method used to solve the research problems is described in this section.

3. Results and Discussion/ Hasil dan Pembahasan

This section consists of results and discussion. Every finding should be supported by sufficient data. Then, research findings should be able to answer the research question or hypothesis stated earlier in the introduction.

4. Conclusion/ Kesimpulan

Conclusion states the answer of the hypothesis and/or research objective or scientific finding. Conclusion is not the repetition of findings and discussion, but it is the summary of findings as expected in the objective or hypothesis. If necessary, conclusion can also be ended with the next idea to be implemented to the study.

5. Acknowledgment/ Ucapan Terima Kasih (Opsional)

Acknowledgment are primarily addressed to research funders or donors. Acknowledgment can also be dedicated to people who contribute in the study.
