The climate crisis is deepening, frontline communities continue to be victimized by the fossil fuel industry, and Trump's [FERC \(Federal Energy Regulatory Commission\)](#) is going from bad to worse. It's time to take action at the FERC headquarters in Washington, DC to call for its replacement by FREC, a Federal Renewable Energy Commission!

The call for FERC Into FREC is supported by [220 local, state, regional and national organizations](#) and [presidential candidates](#) Bernie Sanders and Elizabeth Warren and the Green Party's Howie Hawkins and Ira Schlakman.

February 20th is the next monthly meeting of the FERC commissioners. In December, by a 2-1 vote, they decided that new, non-fossil fuel sources of energy that receive state subsidies, like the sun and wind, would be penalized and forced to pay more to access the PJM electrical grid that serves 13 states and DC. They

continue their decades-long policy of rubber-stamping approvals for every gas industry expansion permit. The odds are high that they will support Trump's just-announced proposal to weaken currently required environmental and climate reviews via the National Environmental Policy Act (NEPA).

For more than five years Beyond Extreme Energy and other groups have been taking action at FERC, shining a spotlight on its corrupt ties to the fossil fuel industry. It's time for nonviolent escalation! On February 20th, let's attend their public meeting and make clear that it's time for big changes at FERC—it's time for a Federal Renewable Energy Commission, FREC, to replace it! So far 75 [organizations and 340 individuals](#) have signed to endorse the Disrupt FERC actions!
