$GROOT: The Ultimate Meme Coin & Sniper Bot

Whitepaper | 2025

---

1. Executive Summary

$GROOT is more than just a meme coin—it's a game-changing Telegram sniper bot powered by Solana, designed to autonomously detect and snipe new tokens the moment they drop. By monitoring Telegram channels and X (Twitter) accounts, the $GROOT bot automatically buys in at launch based on user-defined amounts, stop-losses, and target settings.

With an AI-driven scanning engine, blazing-fast execution, and secure transactions, $GROOT empowers traders to seize opportunities first—before the hype kicks in.

Key Features:
- ✅ Real-time Telegram & X (Twitter) Monitoring
- ✅ Auto-Buy on New Token Drops
- ✅ Customizable Risk Management (Stop-Loss, Targets, Slippage)
- ✅ Lightning-Fast Solana Transactions
- ✅ Meme-Powered, Community-Driven Ecosystem

$GROOT is not just a token—it's a revolutionary trading tool built for speed, precision, and profits in the wild world of meme coins. "I Am Groot… I Snipe First!"

2. Introduction

2.1 Background & Vision

Meme coins are booming, but sniping early buys is often limited to insiders, dev teams, and private groups. $GROOT levels the playing field by giving everyone access to an automated sniper bot that executes instantly when new contracts are posted.

Inspired by Groot's unstoppable growth, we built a powerful, automated, and community-driven tool to help traders capitalize on microsecond opportunities—turning early snipes into major gains.

2.2 Why $GROOT?

- 🚀 Speed Wins – The fastest buyers make the most profit. $GROOT executes instantly.

- 🤖 Smart Sniping – Fully automated buy-in logic removes human delays.
- 🔒 Risk Management – Set stop-losses & take-profits for controlled trading.
- 🌱 Meme Culture – A fun & engaging community behind an actually useful project.
- 💰 Built on Solana – High-speed, low-cost transactions for max efficiency.

3. How the $GROOT Sniper Bot Works

$GROOT is an AI-enhanced, real-time scanner that monitors Telegram groups and X (Twitter) feeds for new token contract drops. Once detected, the bot:

1. Snipes the Token Immediately – Places a buy order the second the contract is posted.
2. Sets Auto-Stop & Targets – Executes pre-configured stop-loss and take-profit settings.
3. Monitors Price Action – Updates users with real-time notifications in Telegram.
4. Sells Based on Strategy – Automatically takes profits or cuts losses based on custom settings.

Users configure:
- ✅ Target Telegram Groups / X Accounts
- ✅ Pre-Set Buy Amounts
- ✅ Stop-Loss & Profit Targets
- ✅ Max Slippage & Gas Preferences

🔥 Fastest hands in the game? Nope. $GROOT snipes before you even blink.
