CHROMEBOOKS

Our school provides students with a chromebook in many learning situations, but many parents choose to purchase a chromebook for their child while they attend junior high so that they might transition seamlessly from home to school. **These devices are highly recommended.** They allow students to create, save and access all of their school files and can be purchased at most computer or technology retailers. Students use electronic devices at the discretion of their classroom teacher. ELJHS is not responsible for the security of electronic devices or other personal property.
