

Art Portfolio ONE

Major Project Working Plan

Shipbuilding on the Clyde, Stanley Spencer, 1940

****Complete the sections of the plan that are in GREEN after your Sign Off meeting and upload it to your Blog with comments on how you will develop your project ****

****Please complete the sections in purple over the term as you work on elements of your project****

Name: Aaeesha Braimoh

Major Project Title:_____

Subject Area: Architecture

Week 3: Summarise the MAIN ELEMENTS of your Project Statement here:

The concept of my project is a theatre hall aimed at contemporary music and performance lovers. It will be located in Durban, South Africa and it is designed with the purpose of expanding and sharing African culture, music and art. The building takes inspiration from the Protea flower which is the national flower of South Africa

Week 3: Who are you researching for this project and how are they RELEVANT to your project? Please list below at least **three artists and/or designers and your additional research on your concept**

1. Mick Pearce
2. Peter Rich
3. David Adjaye

Additional Research on Concept/Materials/Sustainability/Technical skills:
Materials- sandstone, clay (timbre/Catalan vaulting), timber

Week 3: What is the timescale for this project, considering that your DEADLINE is in Week 10? Write in detail what you are planning for each week:

Week Three:

Week Four: Artist Research, design development (developing skills on Procreate and Sketchup)

Week Five: Skills workshop, further practice on skills, design development and improvement,

Week Six: Begin 3D model, experiment with ideas, further research

Week Seven: continuous work on 3D, finalisation of 3D

Week Eight: Begin concept boards on photoshop and digital portfolio on to website

Week Nine: Finalisation of blog and website portfolio, general review of designs

Week 7: Update: How you are managing with this timescale as you approach the deadline

I have done all but one of my 2D drawings and will commence my 3D model at the end of week 7. Regarding my blog, even though I have my drawings I am a bit behind on transferring them onto my blog posts. I hope to complete my 3D model by the end of week 8 and begin to transfer my outcomes onto my website.

Elevations-done

Site map- done

Concept drawings- done

Section- yet to finish

3D model- yet to finish

Week 7: Update with your further research and state the research you have completed from your sign off here:

I have completed research on Mick Pearce and on the Zhengzhou Grand theatre (which I included onto my project sign off sheet during my week 6 tutorial)

Week 3: Which techniques/skills are you developing/learning for this project?

**Procreate
Sketchup
Model making (plastics, woodwork, 3D printing)**

Week 5: Skills Week and Workshops - discuss the skills you learnt and developed for this project? How have they helped to develop your project? Add a reflection here:

During skills week, I attended the following workshops: metal, woodwork, model making and plastics and concept drawing and model making. The model making and plastics workshop was helpful because my model will be done utilising the materials in the workshop, I learnt how to use some machines and took note of some methods which would be helpful when making my model

The base of my building which would detail the environment will be done with wood so it was beneficial for me to attend the wood workshop

The metal was not really helpful as I do not plan on using it but it was good to learn as it may be helpful for future projects

During the week I was also able to learn how to make a concept drawing and also a 3D model. I made a 3D prototype of my building with paper, which enabled me to understand how my building would look when creating the 3D model and see all angles of it. I also learnt how light could affect my building.

Week 3: What do you expect the final outcomes of the project to be?

The final outcome will include six 2D drawings; 2 elevations, 1 section, 2 concept sketches and 1 site map done digitally using procreate and sketchup. Including one 3D model as well

Week 3: What resources or materials will you need for this project?

Plastics
Wood
Card
Mount board
Acetate
Metal
cardboard
IT

Draw a picture/Write a sentence/sketch a story/write a dialogue that captures the essence of your project
