

Category Style Notes Template

Sources are numbered and kept in a separate table

Notes are organized into categories, as needed.

Use a source table to list citation information for each source. Keep this list of sources at the top of your notes section. Give each note the number that matches the source.

Source List (Give each source a number - add rows as needed)

| | |
|---|------------------------------|
| 1 | (Source Title, Author, Link) |
| 2 | |
| 3 | |

Brainstorm a list of categories of information you are hoping to find.

List them below in bold

TIP: Create a list of categories and use internal bookmarks to find them easily

For each category, paste the table below. Add rows as needed. You may mix various sources in one table; simply note the source # from your main list for each note. Each row is one note.

Copy/paste a new table for each category. Keep this one blank

| Category: | | | |
|-----------|--------------------------|------------|---------|
| Source # | "Quoted Material" & page | Paraphrase | Comment |
| | | | |
