- P -
- A -
- I -
- N -

Q3 What do people usually imagine about when they think about climate change?

Q4 What example did Dr Galavan use for abrupt?

Q5 Why has it been easy for us to get used to the fact that climate change is happening?

Q6 Why isn't climate change seen as an immoral problem that grabs our attention?

Q7 Who do we think climate change is a problem for?

Q8 What does the bystander effect mean?

Q9 When an alarm goes off what do we look out for?

ANSWERS

Q1 The reasons why people think, act and behave the way they do in relation to climate change.

Q2 Personal, Abrupt, Immoral, Happening Now

Q3 Polar bears and melting glaciers.

Q4 Covid was an example of an abrupt change.

Q5 It has been happening for decades and it will continue to happen for decades.

Q6 There are some bad guys, some people are contributing to the problem more than others but we are all part of the problem.

Q7 Some people think it's for future generations and not ourselves.

Q8 When something bad happens if there are lots of people around we usually wait for someone else to take on the responsibility of tackling the problem.

Q9 We look around to see if other people are reacting.
