Subject line: How I started my journey and changed my life forever

Hey [name],

My name is [first and last name]

Years ago I was lost, I didn't have purpose(at least so I thought) or mission.

I was like everyone else, walking down an empty and lonely path.

I was heading for a dead end.

To top things off I lacked confidence and struggled picking up women. I became more and more disappointed with the man looking back at me in the mirror.

It finally came when I looked around the classroom, at the people in my neighborhood, and even at the people sitting at the kitchen table.

And a little voice in my head said “Are those the people you want to be like?”

My answer was obviously no, but the question wasn’t the problem. It was trying to make it a reality.

So I learned all I could and eventually figured it out.

After knowing what I know now, there was no turning back

After I learned the secrets to being in the top 1%, I had no choice but to take the next step

Subject line: What most men get WRONG

Do you have it all figured out?

Well most men do not realize that they are making these simple mistakes

And it is stopping them from making more money, getting women, and simply living a better life.

And I would hate for you to be making them as well

Now it's not some cold approach mistake or some life-changing financial hack that you didn't know about

It's even more simple than that but people still somehow tend to mess this up

If you're not ready to reach that next level, then that's perfectly fine. (It's not for everybody.)

But if you are ready to elevate yourself ahead of everyone else, then it's time to learn about these simple mistakes. Most men don't even know they are making them, so let me show you what you should be doing instead

Subject line: Time is only making it WORSE

Are you waiting around for the results to just come to you?

“As long as I think positively and manifest it, it will come, right?”

NO!

Positive thoughts and words are important but are nothing without ACTION.

Not taking action is the number one reason why people fail at life.

They don't act on what they're supposed to and continue to:

- Have low confidence and be depressed
- Be broke
- Have every woman reject them
- Be laughed at and disrespected

The men at the top didn't just wait around all day for something to happen.

They took action on specific key parts of their life and became successful.

It didn't matter their height, where they came from or anything like that.

They took the cards they were dealt and they played that hand all the way to the end... and WON!

If you want to:

- ✓ Have Wealth, Women, And Confidence
- ✓ Have a network of valuable people
- ✓ Be able to travel wherever you want at any time
- ✓ Add value to anyone that comes into your circle

Then stop waiting around and take ACTION!

Right now you could be on a yacht with beautiful women and good friends with not a care in the world... Imagine this.
