Music Animator for VK (vkontakte, vk.com) Russian

Introduction

This extension adds a graphical visualizer to the audio player on site vkontakte (vk.com). You can use multiple effects while listening to the music on web site vk.com. Make listening to music more fun!
New visual effects are coming soon!

Instructions

Just turn on the extension and the visual panel will be attached to the player on site vkontakte (vk.com). All vk.com tabs will be affected and reloaded once after the extension is installed. All settings will be saved automatically and applied when vk.com is opened.

Effects and themes

Choose different visual effects (Style) and color schemes (Theme) to have more visual fun while listening to the music!

Frequencies

You can adjust the range of the frequencies to fit visualization perfectly into the display window.

Audio players

Visualization attached to both players (main at the Music page) and the top player (at the top of the page). Changing settings of one will affect all visualizations.
