

Bibliography

Jinho Jung is a Professor of Water Quality in Division of Environmental Science & Ecological Engineering at Korea University since 2002, and a Director of BK21 FOUR R&E Center for Environmental Science and Ecological Engineering. He received his B.Sc. in Biology (1993) from the Korea Advanced Institute of Science and Technology (South Korea) and Ph.D. in Chemistry (1997) from Cardiff University (UK). His research interests include application of micro-nanobubbles and sorbents for water quality improvement, risk assessment of microplastics and their additives in freshwater environment, toxicity assessment, identification and reduction in natural and waste waters, and modeling of climate change effects on freshwater fish distribution. He has authored/co-authored more than 108 SCI and 36 domestic journal articles and 3 book chapters.
