 - [Placeholders in search form in staff catalog](#)
 - [Untranslatable strings in the print template t_bills_current.tt2](#)
 - [Web staff client does not work properly when Czech is switched on](#)
- Accessibility (big sweeps in bold!)
 - empty alt text for OPAC book covers and format icons to eliminate redundant screen reader announcements of item titles and formats (#1965985)
 - **text alternatives for all icons and images in the staff interface (#1818086, #1833726, #2042492)**
 - improved color contrast for links, buttons, and form inputs throughout the staff interface (#2018326, #2019735, #2028088, #2043238, #2043847)
 - **keyboard support for all buttons in the Angular staff interfaces (#2039310, #2040303, #2043424, #1850473)**
 - **form fields are properly labeled in all core UI components in staff interface (#1999158, #2009853, #2043421, #2019031, #2039606)**
 - form field labels for staff catalog search preferences (#2036313)

- form field labels for patron survey question administration (#2040186)
- improved landmarks and headings for screen reader navigation in staff catalog (#2039483)
- improved table navigation for staff catalog shelving locations (#2016742), cash reports in administration (#2039311), and patron survey answers (#2040184)
- improved screen reader announcement of repetitive links in staff catalog items table (#2016343)
- automated accessibility tests for developers (#2035535)

3. What to look for in the 3.12 beta and RC releases:

- Org unit selectors with wonky labels
- *any* color contrast issues (especially black hover text on turquoise buttons)
- Forms that you could previously submit by pressing Enter in an input, but now cannot (this is related to the big button keyboard compatibility sweep)

4. UI-related bugs that need feedback:

- [#2021862 Placeholders and help text in the fieldmapper editor](#) - needs reviews & signoff
- [#2023803 Stop using yellow buttons](#) - the new button colors are in 3.12! (see Custom OU Trees) What other red and yellow buttons would you like to see replaced? List them here or comment on Launchpad! (Please include a URL path or describe how to get to the screen. Thanks from the new devs!)
 - SERIALS - Stephanie
 -
- [#2044853 Progress bars must be labeled for accessibility](#) – needs review. Do the progress bar labels make sense? (You will have to review the code, since the labels are invisible and the progress bars disappear as soon as data has loaded, usually too fast to inspect.) Grid labels will be added to our 2024 grid work.

5. Upcoming work on editorial issues:

- [#1948991 Administration Options - Mismatch between menu name and interface name](#) – updates needed to Acq menus
- [#2018839 Unclear "name" label in create PO form](#) – what should this say instead?
