Reasons Why Catholic School Teaching is Right for You.

1) **Students and Parents are very invested in learning.**
   This is a faith-based environment with high academic standards. There is a higher level of engagement here than you will find in a public school. Our parents want to see their children do well and are willing to be part of the "team" to ensure this happens. Higher levels of parental engagement also mean fewer classroom behavior problems.

2) **Smaller class sizes**
   This provides the teacher with the opportunity to be more individually engaged with each student. You'll have less papers to grade, fewer parent teacher conferences, and less administrative work, all meaning more time for exciting learning activities that you just won't have the time to do in a public-school setting. Small class sizes coupled with clear discipline policies, and active parents equals fewer behavioral problems as well.

3) **Opportunity to express your faith.**
   You are able to practice and grow your faith at work. You get to serve as a spiritual role model and share your love of God with your students on a daily basis. Our schools are committed to educating the whole child and making faith the core of that education.

4) **The Culture.**
   We promote a healthy and collaborative workplace culture. We seek teachers who are passionate about teaching and desire to build caring relationships with their students. Teachers are valued as respected professionals who are trusted to do what is best for their students. The families come to our schools because they want their children to grow their bodies, minds, and souls. The common bond between the families and the classroom is their love of God. The desire to learn is palpable in our schools.

5) **Opportunity for your own Spiritual Growth.**
   Opportunities to see your full potential as a person of faith. This job can have a profound impact on your spiritual life allowing you to grow and learn daily from religious leaders. It's an opportunity to live your faith and make a difference in the community.

6) **Management Structure.**
   A thin management structure at our schools means you don't have to go up or down through layers of bureaucracy to deal with issues. Most decisions can be made on a local basis so schools can remain flexible and nimble.
