I was given your information from a friend in the RHU building. I've been constantly writing up about our violated human rights And about our RHU building cells not having sprinklers. I'm looking to be a part of the potential lawsuit and I'm in my ice stage waiting for ice to bring forward a decision on the matter.

My cell was searched(Mass shake down) and I was brought to the hole 4523, my personal property was packed on 4923, I received my allowable property and copy of the rest(inventory sheet) of my personal property. Let It Be noted that my property was secured in the property storage place(Locker). ...The majority of my property was on my cellmates inventory list which was brought to me on 42523. Then I was given my cellmates property. I gave it back To COs And complained about mine. I was told that none of my paperwork didn't come to property room. Lieutenant then had my cellmate to give him what property he had of mine that he got from property officer which was my shower shoes/ brush phone book/ no legal material/ letters/ pictures/ obituaries cards Etc which I get everything in the hole. Property said that the CO never sent my above missing property. So now sergeant said talk to property, everything was packed and sent to property room. I have video footage preserved of my receiving my property from cos that I do have, CT conversation, me giving inmate property right back out to officer and the ? was packed to show all my property was packed and sent to property room.

Multiple convicts have been dealing with the same thing. I'm looking to pursue a lawsuit due to my case. It's the criteria of a lawsuit when it comes to misplaced inmate property. Although I'm not at all good at filing and have lack of knowledge of proper ways of putting it together. I have all documents, responses preserved, video footage and still writing. If possible could I be guided or helped with this lawsuit? Thank you. And I would like to lend my appreciation to any and all who helped towards our care and treatment which is horrible here at WCI.

Rats, Roaches, Birds bats, blood splattered throughout cell Halls. clothing torn, no not enough food less and less, no rec, no legal Library, bedspread and sheets Old and torn, excessive force constant. tactics to keep from standing up even when our health and safety is concerned. Short of staff is why they say we're on lockdown, no form of visitation, (sentence cannot read), Almost done so I do feel like the DOC is getting over when it comes to money. Definitely not spending it on what we're supposed to have: food clothing, phones, commissary went up again, like the vendors that DOC uses are already invested in/ on from Doc authorities. win/ and they look over other better sources for vendors because they're not able to bully them In order to bully us. thank you for listening .I want great in all your endeavors in life, wholeheartedly
sincerely Daniel Owens
