OPERATIONAL DEBRIEFING FOLLOWS....

A routine anti-pirate and contraband patrol of Promethean Sectors VIII and XII-IX, by TSN Raven and TSN Lancer, was interrupted by unauthorized access to and operation of the Cronus Jump Gate. The intrusion cyberstealth delayed detection until the patrol encountered a significant Kralien task force with Skaraan auxiliaries in Sector XII. The task force was eliminated, following which TSN Lancer suffered significant failures to Manoeuvre and Primary Beam systems, which they were able to repair at DS-15. The local repair Chief noted in his report that prior to recent efficiency improvements, Lancer's systems would have been due for preventive maintenance two months earlier, but will now no longer need servicing next month.

The patrol then proceeded to retake control of the gate in Sector XI from the defensive picket in place. Continuing the patrol into Sector X, further Kralien pickets were found and eliminated. DS-43 command reported that the picket had been jamming their transmissions and that the rest of the task force had transitioned through to Sector VI. The patrol gave immediate pursuit and discovered a further heavy detachment of Kraliens which were engaged and destroyed by Raven and a pair of Skaraans investing the Aetan civilian base. Lancer intercepted and destroyed both during their exfiltration from Aetan. Two life pods were recovered containing Skaraan crew and a civilian human who were all returned to Promethean Command.

Interrogation revealed that the Skaraans were under contract to perform the exfiltration. Their War Corporation standard diplomatic insurance permitted their repatriation via regular commercial channels.

Interrogation and biometric records cross reference revealed that the human was operating under cover as an accredited associate researcher attending the Aetan Institute of Astro-Archeological Studies. The institute conducts research into traces of Forerunner Megastructures and Energetic Events and their repercussions on galactic civilizations. This cover identity showed significant evidence of tampering and the

underlying identity has not yet been fully uncovered but shows signs of radical xenotheistic connections including tithes to the Kralien Embassy Rent Arrears Fund.

OPERATIONAL DEBRIEFING ENDS....

CURRENT FLEET INTELLIGENCE:

Be alert for cyber-intrusion, masked Kralien probes and undercover operatives disguised as civilians. Kralien and Skaraan vessels operating in tandem. Presume Skaraans hired by Kralien forces, whether rogue cell or official Kralien assault.

Command believes that elements of Kralien armed forces are prepared for conflict with the USFP. We are uncertain as to their intentions at this time. More research on this is under way.

MISSION PLANNING:

TSN Command has rebased the 4th Light Division to Prometheus for the time being. Whilst there, the 4th Light Division shall handle the primary response to any hostiles attempting to raid installations or ships.

TACTICAL RECOMMENDATIONS:

Maintain policing efforts against other hostile elements within your area of operations.

Handle civilian traffic and repulse any Kralien assaults, should they occur.

Under no circumstances reveal the civilian espionage outside to parties without Level 4 Clearance. It is imperative to keep the full extent of our intelligence assets from foreign actors and to minimize civilian panic.
