Seeking an opportunity with [Org name] to utilise my skills in [insert job spec relevant skills] to help improve your cyber security capability.

EXPERIENCE

Company Name, Location

Job Title

MM/YYYY-Present

- Tailor your experience sections to the job description. Don't use up too much of your space detailing daily duties that aren't relevant to the job for which you're applying.
- Study the job listing to figure out what's most important to the hiring manager. Use important CV keywords and accomplishments that speak to your ability to execute.

Company Name, Location

Job Title

MM/YYYY-MM/YYYY

- Work the hard skills and keywords found in the job description right into your CV.
- That said, simply listing the keywords isn't enough. Provide as much context as you can in this limited space to prove that you really do know your stuff.
- For example, if you mention a piece of software you've worked with.
