

The #AlwaysSparkleInitiative | Every Heart Matters

CHD Spotlight Series

In loving memory of Sparkle Kyelle and in honor of her brother, Kyle

A Little Moment to Sparkle

The **CHD Spotlight Series** is a weekly educational feature by Always Sparkle by Kyle, created to help families, caregivers, and communities understand Congenital Heart Disease in simple, clear, and compassionate language.

Each week, we highlight one CHD condition, what it is, how it affects the heart, early warning signs, treatment options, and how parents can advocate during emergencies. Our goal is to make CHD knowledge accessible, reduce fear, and empower families with life-saving information.

This series is inspired by Sparkle Kyelle's journey and honors her brother, Kyle, who continues to shine through every act of awareness and advocacy.

Week 1: TAPVR (Total Anomalous Pulmonary Venous Return)

Week 2: VSD (Ventricular Septal Defect)

More weekly CHD spotlights will be added as the initiative grows.

Every Heart Matters.
