

Article written against ceaser millan's
approach Vandann: Hadar

- his direct shows he lacked
fundamental understanding + even dog
genetics
- one line of thinking he has that is
negative
- self trained
- alpha theory → outdated and harmful theory
originally derived from and applied to
dominance ranking and herachial behavior
observed in that of captive wolves

NPR

The science of understanding Dog Behavior

- dog are neither wolves or furry humans
- dogs see any attention (good or bad) as reward
→ instead when they do something bad give no attention
- body language
- dogs crave company of humans

ceasar manson

leash aggression

- it's all about owners energy
- redirection
- follow not lead
- "chh" sound to snap out pulling at dog's
- place leash higher on neck
- dog psychologist

Training for starters

- mexican halter
- the nose, the eyes, the ears
- train in a safe environment
- calm, confident, love and joy

Dog that grabs everything

- avoidance
- family's energy
- hyperactivity
- don't chase (no frantic energy)

It's not the dog that's the problem

walking an anxious dog

- Feed calmness through leash
- Remain confident
- Energy!
