

Benefits of one world One governnace- In One Hour

Bring all the heads of the countries announce and ask everyone to follow.

Simple easy and highly effective.

1. Increase in trade and higher turnover of money than before improving the economy.
2. No differences more diversity - Increase in tourism in all countries.
3. Eliminate the cost in defence which can be used for the welfare of the people. Use army for strict law and order and instill discipline in everyone.
4. Focus only on growth instead of making relationships as everything is one now.
5. Standardized best practises, laws and customs across all the parts of the world.
6. Reduced taxation and possiblitty to remove taxation in near future.
7. Creates more employment opportunities - opens up talent pool across the globe with minimal restrictions and formalities.
8. Can help each other to grow when everyone grows it benefits everyone even more.
9. Eliminates corruption and brings transparency.
10. Reduced ego of people as now no one is big, **and need to collaborate with each other.**
11. Citizens gets benefited as they can spend more when they are paying less taxes.
12. Cross country culture helps everyone to understand - brings more richness in life.
13. Auditing by people from unknown and different parts of the world makes it difficult to sustain the wrong doing and will be easily identified.
14. No wastage of government expenses to make relationships with other country counterparts.

How will it work

15. Everyone will agree to common rules, laws and regulations
16. Everyone will review all the best practises being followed and agree the best one which will be applicable to all.
17. The current governance will remain as it and will eventually be centralised as per the common consensus and agreement which improves the trust between everyone.
18. Everyone agrees for equal growth of everyone without any bias and are willing to help the underdeveloped countries similar or better then what they would have done in their own country.
19. Places which benefit the areas which are underdeveloped will get more recognition. When everyone becomes more or less equally developed the concept of domination or control will naturally cease to exist.

People Enterprise

20. Governance will be an enterprise and not a mode of governance. citizen will be customer and owner both simultaneously.
21. **All the expenses will be from the income of the people's enterprises and hence in practical reality no one will be required to pay taxes.**

Vision of 2 billion quality population by 2400 to move ahead of the Golden age (Satyug)

Reduce the population to gain more happiness with very simple and effective techniques.

22. The population will get reduced to half in the next 50 years if everyone has only one child. Two people die and one quality person is born and eventually, the quality will improve. It is easy to focus on one and give all that is required to make a person wise and helpful to others. When parents bring up their children with an attitude to serve others, they will get more benefit than anyone else.
23. No need for the girl to go to boy house or make the boy to the girl's house after marriage. The entire family of both girl and boy can live together. So no one needs to sacrifice their child for others. This will actually merge the wealth of two families and help the newly married couple also happy. Even parents can enjoy their life with only one child. Aged parents will get proper attention with high-quality children, then multiple poor-quality children. Aged parents will also have more company to spend their leisure time with each other when children go to work. (Instead of two and now they are four)
24. People who do not have children should be given full support and facilities in reducing population explosion. This couple will enjoy the life to the fullest with least dependencies and sufferings as they are only two in old age.
25. People who do not even marry or produce even no children will have more time to enjoy life as there is no dependency on any second individual as well. People who do not marry should avoid any sexual relationships with another without marriage. This will actually help them to understand and utilize the energy within and merge into the universe directly. Such kind of people will be a huge value add to society.
26. Old age facilities should be provided by the government to ensure that people produce only one quality child instead of the multiple without the fear of old age sustenance. Old aged people can be given small tasks and assignments which they can do and help them to keep themselves occupied.
27. This entire process within 180 years should bring down our current population from 7+ billion to 2 billion. This will help us to live life properly and have a better quality of living beings who can live collaboratively and enjoy life with limited resources. Here the concept of God will cease and every individual will become like God themselves. The journey of kali yuga(dark age) to satyug(purity and bliss) has started and we can create a better yug than a satyug in next 200 years which should be everlasting.
