Jan. 2019– 2017

University National Mayor of San Marcos, San Miguel. (Lima, PE, Perú.)

Bach. Philosophy.

Jan. 2012– 2017.

Pontifical Catholic University of Peru, (Lima, PE, Peru´)

B.S. Mechanical Engineering

Jan. 2001 – Dec. 2003

RESEARCH EXPERIENCE

University National Mayor of San Marcos (Lima, Perú)

Jan. 2012 – present

TEACHING AND MENTORING EXPERIENCE

School to Trento in Ventanilla (Ventanilla, PE, PERU)

- Reforge to Students
2021

January 2018 – march

Project: *Motivation and preparation for group of teachers.*

Peruvian wings university

- Teaching Assistant, thesis in engineer of system

Spring 2021

Faculty of Pontifical and Civil Theology of Lima

- Teaching Assistant, thesis in education

2013 – 2014

University San Martyn of Porras (Lima, PE, Peru´)

- Teaching Assistant, thesis in doctor of psychology

Fall 2021

RESEARCH INTERESTS

Most of my career has been dedicated to research and mentoring, I have patience to explain in depth the concepts of science, philosophy, and other knowledge that I am a member of several and diverse research groups of the Ten America over the last few years, and we have been investigating different areas, currently I have been publishing and seeking to position my research as part of the philosophy and liberation group but also in the field of epistemology and the philosophy of science.

I consider that my skills, rather than being more dedicated in the academic field rather than the work, are a source of many types and groups of work with children, youth, adults and the elderly, my social and educational claim seeks a search for the correct way and very particular contributions that each person has and is unrepeatable; having experience in technology research and development at the PUCP university, With whom I took courses in social anthropology, cosmology, theology, and various knowledge that sought what I had noticed from a very young age; Education must lead us to industrial revolutions with social commitments, which are currently technical in nature but must address different problems, because as we see the resolution of large projects in the country is due to a magnificent and very rich technical and technical preparation. specialty such as health, medicine but that they themselves face problems such as the resolution of corruption in public streets.

The application of the Ministry of Education in the application of the political calls since 2015 of intercultural dialogue and its most current versions of gender ideology and works on ecological lines and "green" law. They make us see that getting to encompass these more complex problems is the only solution to continue surpassing ourselves in the development of achieving policies that represent and help all Peruvians.

I also have jobs and job dialogues with specialists outside the country on topics of chemistry, physics, nanotechnology: among my friends with whom I work with different areas of engineering and neurosciences are Dr. In Physics Jorge E. Morales Ugarte, and other professionals of public health against which we must go generating medical technology and social projects as well with and handling of chemicals and other substances.

Other professors from the universities that I previously mentioned had stays. In addition, the various national and international conferences that I have given over the last few years have allowed me to improve my performance before the public in English and Spanish.

I consider myself someone capable of taking risks, and being in front of a research group. Able to direct other people and teach them skills and knowledge necessary for a career, research or for day-to-day life.

I am also joined by radical commitments to the most traditional and innovative teachings for everyone because each one can led to social circles that others cannot.

PUBLICATIONS – ACCEPTED/SUBMITTED/PREPARATION

Thesis work at the FTPCL: Title: "Kant as a proposal for an adequate understanding of quantum mechanics (MC)". Lima December 1, 2008.

With the reviewers of Lic. Fernando Muñoz Cabrejo and Mg. Julio Toguchi I. Who represented the part of modern philosophy, at that time 2008, by Kant and his philosophy in the case of teacher Muñoz, and for the epistemological part in undergraduate for Mg. At that time Julio Toguchi I.

V International Philosophy Course: "The Philosophy of Humanism in Spanish Thought." Held from 14 to November 2011. In Count of Superunda, next to the Basilica Santo Domingo.

PROFESSIONAL AND HONOR MEMBERSHIPS

Upper third to my promotion to philosophy.

TECHNICAL SKILLS

Strong knowledge in numerical methods for continuum and discrete systems

Mathematical proficiency Computer Programming:

- **Strong:** Pascal.
- **Intermediate:** C++.

Numerical Analysis:

- **Strong:** MATLAB, MathCAD.
- **Intermediate:** Mathematica, Maple.

Desktop Editing and Productivity Software:

- **Strong:** TEX (LATEX and BIBTEX), Microsoft Office, OpenOffice, LibreOffice, Google Docs, keynote, Pages, InkScape, ImageJ, CorelDraw.

Operating Systems:

- **Strong:** Microsoft Windows family, Apple OS X, Unix, Linux (Linux Mint, Ubuntu)
- **Intermediate:** Linux (fedora)

Design Software:

- **Strong:** Solid Works, AutoCad.
- **Intermediate:** Inventor
