

CANDACE WOSTREL-GLATCH, BSN, RN

Founder, CEO & Master Aesthetic Injectionist — HAVEN Mobile MedSpa

Who Owns and Operates HAVEN

HAVEN is owned and operated by Candace Wostrel-Glatch, BSN, RN — a registered nurse with 17+ years of clinical experience, including urgent care and emergency nursing. Before nursing, Candace was a licensed cosmetologist, giving her a rare combination of beauty expertise and medical precision that is at the heart of everything HAVEN offers. Candace is the Master Injectionist and leads all clinical services personally.

My Story

My background in aesthetics and healthcare has always centered around helping people feel confident and cared for. Many years ago, I began my career as a cosmetologist before later becoming a Registered Nurse. I spent years working in Emergency Room and Urgent Care settings, caring for patients during some of their most vulnerable moments.

When my father became ill, I moved to Arizona to hospice nurse him during the end of his life. That experience deeply changed me. During that time, I began envisioning a different kind of care — one focused not only on health, but also on confidence, self-esteem, and helping people feel beautiful in their own skin.

That vision eventually became HAVEN Mobile MedSpa.

This work is deeply personal to me. I was bullied in high school, so I understand how much appearance and self-confidence can affect the way someone feels inside. Being able to help others feel more confident, refreshed, and empowered is truly my passion. When my clients feel good about themselves, it genuinely brings me joy as well.

As a BSN, RN and aesthetic provider, my goal is to combine medical knowledge, compassion, luxury, and convenience to create an experience where every client feels safe, valued, and beautiful.
