

## **Research Poster**

Is the hypothesis or main scientific question clear?

Does the presented data test the hypothesis or address the scientific question?

Are clear conclusions drawn?

Is the layout of the poster easy to follow?

Is the use of graphics effective?

Are collaborators/funders acknowledged?

Was the speaker engaging with the poster audience?

Was the presenter's explanation clear and easy to understand?

Was the presenter able to answer questions about the research?

## **Proposal Poster**

Is the hypothesis or main scientific question clear?

Would the proposed experiments test the hypothesis or address the scientific question?

Is the layout of the poster easy to follow?

Is the use of graphics effective?

Does the presenter acknowledge likely collaborators and resources required?

Was the speaker engaging with the poster audience?

Was the presenter's explanation clear and easy to understand?

Was the presenter able to answer questions about the proposal?

Does the poster contain relevant literature to serve as background for the proposal?

Does the proposal have a clear plan in place to execute the project?

## **Literature Poster**

Is the hypothesis or main scientific question from the chosen paper clear?

Has the presenter formulated conclusions from the published data?

Has the presenter detailed potential additional experiments that would compliment the published work?

Is the layout of the poster easy to follow?

Is the use of graphics effective?

Are paper authors acknowledged?

Was the speaker engaging with the poster audience?

Was the presenter's explanation clear and easy to understand?

Was the presenter able to answer questions about the research?
