

Research the community need or issue

Plan Brainstorm (Can do as a group, but submit plan from each person participating)

Your Name:

Group Topic:

Group Members' Names:

Describe the issue, need or problem

What is a issue that you have found facing your community that you would like to do something about?

What specifically is causing this issue? If it is several things, pick one to explain

How long has it been an issue?

Find Statistics and facts that show your issue is a problem in the Fresno/Clovis Area/California. Find a statistic on the internet about your selected community or school issues. Perhaps a statistic on the effects of this issue, not only on the individual but on the school or community as a whole?

Indicate information on issues that arise on school campus or in your community due to this problem. Include where you found information to make it valid.

Why has this problem not been addressed or if it has, what has been done?

Research the community need or issue

How do students at your school feel about this problem or issue? Ask them. Quote them below

Find Facts and/or Statistics that show your solution can help the problem. **Provide the source where you find this information**

Find at least one quote about the issue from a person affected by the issue.
(like if your issue is homelessness, find a quote about being homeless from a homeless person.)

Projects and Community Partners

If you had all the resources you needed, what would you like to do to address or help the problem?

Research the community need or issue

How would you accomplish this project? What are the steps you plan to take and what do you still need to do?

Who might support your idea (school, community partners)? How will they support you?

What do you need from the school or community partner?

Why do you feel the school or community partner should help?

List all of the community partners that can support your project. Name, organization, phone number and email.

Research the community need or issue

When do you need this done by?	
Anything else to add?
