

## Funding Proposal for HydraDX Operation and Maintenance Fee

Dear HydraDX Community,

We hereby submit our proposal for funding support to cover the operation and maintenance fees associated with the Subscan Explorer services provided for HydraDX.

### Service Details:

Subscan has been diligently providing the following essential services for HydraDX:

1. **Computing Resources:** Collecting and parsing chain data, and serving web user requests to ensure smooth network operations.
2. **Database Storage:** Indexing and storing chain data for seamless data retrieval and accessibility.
3. **Network Egress Bandwidth:** Maintaining optimal network performance to cater to web user requests.
4. **Monitoring and DevOps:** Implementing an internal alerting pipeline and automation for stable network operations.
5. **Node Status Monitoring and Notification:** Promptly notify the network development team of any issues.
6. **Technical Support:** Offering comprehensive technical assistance for the networks' uninterrupted functioning.

---

**Summary of Current Charges:**

Following the cooperation contract and agreement signed by both parties, the details of the fees are as follows.

Subscan is pleased to offer comprehensive support for the AssetRegistry, Tokens, and XTokens modules across the HydraDX and Basilisk networks. This specialized service is available at a package price of 5,000 USD and will be delivered within 1 week.

Subscan Basic Maintenance Package offers exceptional value at just \$799 per month, which includes up to 200GB of data services. Should your usage exceed this allowance, a charge of \$10 per additional GB per month will be applied. As for the HydraDX network, the latest usage statistics indicate that you have utilized 165.29 GB of data. For detailed pricing information, please consult:
