

How to backup your nextcloud service

井民全, Jing, mqjing@gmail.com

Step 1: Mount the external storage device

```
In host,  
cd /var/lib/docker/volumes/ncdata_old/_data  
mount /dev/sda1 ./backup # mount the USB device to the backup folder
```

Step 2: Backup your system

Make sure the target file located at the **./backup/**

```
# Backup the system  
Access the page https://192.168.1.108:4443  
choose [BACKUPS] -> [nc-backup]  
  
Setup the file location as :  
/data/backup/ncdata/backups/ncp-backups-20220924
```

e.g.

NextCloudPi Panel

Not secure | https://192.168.1.108:4443/?app=nc-backup
