

Mini-Project Report Guidelines

Title Page: Project title, name, course, date.

Abstract/Synopsis: Short summary of the problem, method, and results (approx. 100 words).

Introduction: Motivation, problem statement, objectives, and scope of work.

Literature Survey: Brief overview of existing similar projects or techniques.

Proposed System/Methodology: Detailed explanation of the approach, including data preprocessing (e.g., stop words removal, tokenization) and model selection.

System Architecture & Implementation: Flowcharts, tools (Python, NLTK, Scikit-learn), libraries, and algorithms used.

Testing and Results: Analysis of the results (e.g., confusion matrix, accuracy score) using graphs or tables.

Conclusion and Future Scope: Summary of findings and potential improvements.

References: Citations of papers, websites, and libraries used.
