

For the business clients part of the page:

My headline: "Measured sun protection, installation that lasts – guaranteed."

My sub headline: "You do the job; we shade the sun. Together, we create cooler work environments and homes."

My copy after the head and subline:

Many people dream of the tropical beach when they are in the office, but no one wants the tropical heat inside the office.

[Button] "Remove the heat now" --> contact form

Why?

Staff productivity is rapidly deteriorating. The brain functions less well when the body spends energy on cooling itself down.

There is no (*serious*) CEO who chooses to hold the annual meeting in a hot sauna.

Still, we sit in overheated meeting rooms and blame the cooling system for not working. But is it really the cooling system we should blame?

It is obvious that the sun is warming. It heats the air, the façade, the windows and everything that the rays reach. Floors, furniture and indoor air are converted into heating elements during the working day.

Even if you choose to fix something else first (AC, façade, windows, moving the office to Iceland), you will always come back to sun protection.

[Button] "Arrange sunscreen for me" --> contact form

The sun's rays heat the office as long as you have windows. So what do you choose?

Renovation of the façade, windows and cooling system is getting results. Yes. But there are drawbacks:

1. Costly. 🏠
2. The sun's rays still warm the office through the windows. 🔥

Many people don't think about the sun being troublesome in the winter too. But it is by glaring our employees in their eyes and on their screens.

Those who choose sun protection get:

1. Control of the sun's rays. ★
2. Ability to design the office with the products. ★
3. Cooler. ★
4. Some solar-shading products protect without taking away the view. ★
5. Cheaper than renovating the façade. ★

When you choose us, it comes with certain benefits.

Choosing an entrepreneur can feel like looking for shade in the desert. Exhausting.

Once you have chosen a quote, some problems can happen:

1. ✗ The contractor does not update you until the day before installation
2. ✗ The products are up, but barely.
 - Were the products assembled with sufficient screws?
3. ✗ Damages that are hidden on products and property
4. ✗ Lack of guarantees and liability
 - You discover a problem and tell them. What happens then?
5. ✗ "Status updates, what is that?"
 - Getting a handle on how the contractor is doing should be easy.
6. ✗ Sudden additions to the invoice and hourly rates.
 - Do new costs appear when you receive the invoice?
7. ✗ Not used to handling blueprints
8. ✗ Arguing when the GANT schedule changes
9. ✗ Products that break down the day after warranty expires

When you choose us, this headache will go away. You will get:

1. ✓ Updates before and during projects

2.  Assembly that lasts
3.  Responsible
4.  3 year warranty on products and assembly
5.  Fixed prices on all new installations
6.  Products that last long after the warranty has expired

So take the next step.

Contact us and we will see if we can be of help with your next project.
